IMPORTANT INFORMATION

Precautions

Please read this manual carefully before using your NEC LT150Z Projector and keep the manual handy for future reference.

Your serial number is located on the bottom of your LT150Z. Record it here:

CAUTION

To turn off main power, be sure to remove the plug from power outlet.

The power outlet socket should be installed as near to the equipment as possible, and should be easily accessible.

CAUTION

TO PREVENT SHOCK, DO NOT OPEN THE CABINET.

NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED NEC SERVICE PERSONNEL.

This symbol warns the user that uninsulated voltage within the unit may be sufficient to cause electrical shock. Therefore, it is dangerous to make any kind of contact with any part inside of the unit.

This symbol alerts the user that important information concerning the operation and maintenance of this unit has been provided. The information should be read carefully to avoid problems.

WARNING

TO PREVENT FIRE OR SHOCK, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE.

DO NOT USE THIS UNIT'S GROUNDED PLUG WITH AN EXTENSION CORD OR IN AN OUTLET UNLESS ALL THREE PRONGS CAN BE FULLY INSERTED.

DO NOT OPEN THE CABINET. THERE ARE HIGH-VOLTAGE COMPONENTS INSIDE. ALL SERVICING MUST BE DONE BY QUALIFIED NEC SERVICE PERSONNEL.

DOC Compliance Notice

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

3. GSGV Acoustic Noise Information Ordinance:

The sound pressure level is less than 70 dB (A) according to ISO 3744 or ISO 7779.

This label is on the side of the remote control.

RF Interference

WARNING

The Federal Communications Commission does not allow any modifications or changes to the unit EXCEPT those specified by NEC Technologies in this manual. Failure to comply with this government regulation could void your right to operate this equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

In UK, a BS approved power cable with moulded plug has a Black (five Amps) fuse installed for use with this equipment. If a power cable is not supplied with this equipment please contact your supplier.

- IBM is a registered trademark of International Business Machines Corporation.
- Macintosh and PowerBook are registered trademarks of Apple Computer, Inc.
- Other product and company names mentioned in this user's manual may be the trademarks of their respective holders.

Important Safeguards

These safety instructions are to ensure the long life of your projector and to prevent fire and shock. Please read them carefully and heed all warnings.

Installation

1. For best results, use your projector in a darkened room.
2. Place the projector on a flat, level surface in a dry area away from dust and moisture.
3. Do not place your projector in direct sunlight, near heaters or heat radiating appliances.
4. Exposure to direct sunlight, smoke or steam can harm internal components.
5. Handle your projector carefully. Dropping or jarring can damage internal components.
6. Do not place heavy objects on top of the projector.
7. **If you wish to have the projector installed on the ceiling:**
   a. Do not attempt to install the projector yourself.
   b. The projector must be installed by qualified technicians in order to ensure proper operation and reduce the risk of bodily injury.
   c. In addition, the ceiling must be strong enough to support the projector and the installation must be in accordance with any local building codes.
   d. Please consult your dealer for more information.

Power Supply

1. The projector is designed to operate on a power supply of 100-120 or 200-240 V 50/60 Hz AC. Ensure that your power supply fits this requirement before attempting to use your projector.
2. Handle the power cable carefully and avoid excessive bending. A damaged cord can cause electric shock or fire.
3. If the projector is not to be used for an extended period of time, disconnect the plug from the power outlet.

CAUTION

Do not unplug the power cable from the wall outlet under any one of the following circumstances. Doing so can cause damage to the projector:

* While the Hour Glass icon appears.
* While the message "Please wait a moment." appears. This message will be displayed after the projector is turned off.
* Immediately after the power cable is plugged into the wall outlet (the POWER indicator has not changed to a steady orange glow).
* Immediately after the cooling fan stops working (The cooling fan continues to work for 90 seconds after the projector is turned off with the POWER button).
* While the POWER and the STATUS indicators are alternately flashing.

Cleaning

1. Unplug the projector before cleaning.
2. Clean the cabinet periodically with a damp cloth. If heavily soiled, use a mild detergent. Never use strong detergents or solvents such as alcohol or thinner.
3. Use a blower or lens paper to clean the lens, and be careful not to scratch or mar the lens.

Lamp Replacement

- To replace the lamp, follow all instructions provided on page E-49.
- Be sure to replace the lamp when the message "**The lamp has reached the end of its usable life. Please replace the lamp.!!**" appears. If you continue to use the lamp after the lamp has reached the end of its usable life, the lamp bulb may shatter, and pieces of glass may be scattered in the lamp case. Do not touch them as the pieces of glass may cause injury. If this happens, contact your NEC dealer for lamp replacement.
- Allow a minimum of 90 seconds to elapse after turning off the projector. Then disconnect the power cable and allow 60 minutes to cool the projector before replacing the lamp.

Fire and Shock Precautions

1. Ensure that there is sufficient ventilation and that vents are unobstructed to prevent the build-up of heat inside your projector. Allow at least 3 inches (10 cm) of space between your projector and a wall.
2. Prevent foreign objects such as paper clips and bits of paper from falling into your projector. Do not attempt to retrieve any objects that might fall into your projector. Do not insert any metal objects such as a wire or screwdriver into your projector. If something should fall into your projector, disconnect it immediately and have the object removed by a qualified NEC service personnel.
3. Do not place any liquids on top of your projector.

- Do not look into the lens while the projector is on. Serious damage to your eyes could result.
- Keep any items such as magnifying glass out of the light path of the projector. The light being projected from the lens is extensive, therefore any kind of abnormal objects that can redirect light coming out of the lens, can cause unpredictable outcome such as fire or injury to the eyes.
- Do not cover the lens with the supplied lens cap or equivalent while the projector is on. Doing so can lead to melting of the cap and possibly burning your hands due to the heat emitted from the light output.
- Do not look into the laser pointer while it is on and do not point the laser beam at another person.Serious injury could result.

1. INTRODUCTION

Introduction to the LT150Z Projector

This section introduces you to your new LT150Z Projector and describes the features and controls.

Congratulations on Your Purchase of The LT150Z Projector

The LT150Z is one of the very best projectors available today. The LT150Z enables you to project precise images up to 200 inches across (measured diagonally) from your PC or Macintosh computer (desktop or notebook), VCR, DVD player, document camera, a laser disc player or PC Card Viewer.

You can use the projector on a tabletop or cart, you can use the projector to project images from behind the screen, and the projector can be permanently mounted on a ceiling*1. The remote control can be used wirelessly.

Features you'll enjoy:

- Simple set up and operation.
- A high-performance 135 watt NSH lamp.
- The supplied wireless remote control that operates the projector from the front or rear.
- The image can be projected between 30 and 200 inches (measured diagonally).
- Keystone correction allows you to correct trapezoidal distortion so that the image is square.
- You can choose between video modes depending on your source: "normal" for a typical picture, "natural" for true color reproduction.
- The built-in PC Card Viewer allows you to start your presentation even when a PC is not available at the site.
- The "Capture" enables you to capture the current projected image.
- An image can be projected from in front or behind a screen, and the projector can even be installed on the ceiling.
- NEC Technologies' exclusive Advanced AccuBlend intelligent pixel blending technology - an extremely accurate image compression technology - offers a crisp image with UXGA (1600×1200) resolution*2.
- Supports most IBM VGA, SVGA, XGA , SXGA/UXGA(with Advanced AccuBlend)*2, Macintosh, component signal (YCbCr/YPbPr) or any other RGB signals within a horizontal frequency range of 15 to 100 kHz and a vertical frequency range of 50 to 120 Hz. This includes NTSC, PAL, PAL-N, PAL-M, PAL60, SECAM and NTSC4.43 standard video signals.

NOTE: *Composite video standards are as follows:*
NTSC: U.S. TV standard for video in U.S. and Canada.
PAL: TV standard used in Western Europe.
PAL-N: TV standard used in Argentine, Paraguay and Uruguay.
PAL-M: TV standard used in Brazil.
PAL60: TV standard used for NTSC playback on PAL TVs.
SECAM: TV standard used in France and Eastern Europe.
NTSC4.43: TV standard used in Middle East countries.

- The supplied remote control can be used without a cable, and you can even use the remote control and mouse adapter to operate your PC or Macintosh mouse wirelessly from across the room with the built-in remote mouse receiver.
- You can control the projector with a PC using the PC Control port*3.
- USB terminal allows USB mouse operation *4.
- The contemporary cabinet design is light, compact, easy to carry, and complements any office, boardroom or auditorium.
- Eight pointers are available for your presentation.

*1 **Do not attempt to mount the projector on a ceiling yourself.** The projector must be installed by qualified technicians in order to ensure proper operation and reduce the risk of bodily injury. In addition, the ceiling must be strong enough to support the projector and the installation must be in accordance with any local building codes. Please consult your dealer for more information.

*2 An UXGA (1600×1200) and SXGA image (1280×1024) are displayed with NEC Technologies Advanced AccuBlend.

*3 The PC Control Utility 1.0 is required. This program is included on the supplied CD-ROM.

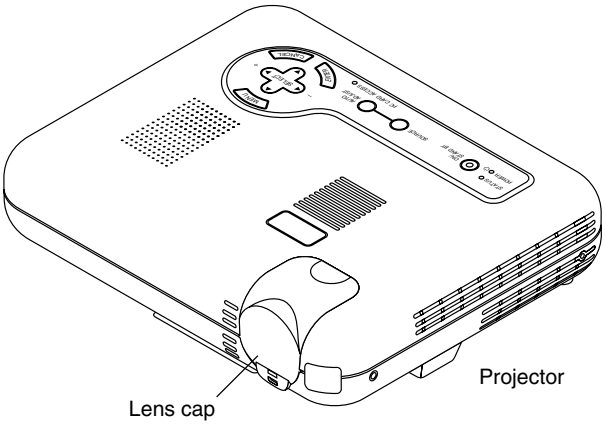
*4 The USB terminal meets the USB1.1 specification and accepts a USB mouse only.

Getting Started

The fastest way to get started is to take your time and do everything right the first time. Take a few minutes now to review the user's manual. This may save you time later on. At the beginning of each section of the manual you'll find an overview. If the section doesn't apply, you can skip it.

What's in the Box?

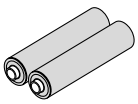
Make sure your box contains everything listed. If any pieces are missing, contact your dealer.
Please save the original box and packing materials if you ever need to ship your LT150Z Projector.



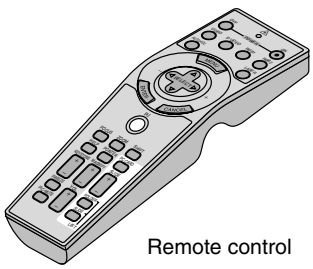
Projector

Lens cap

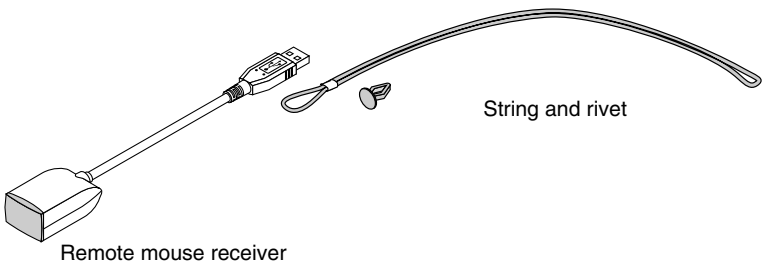
Soft carrying case



Batteries

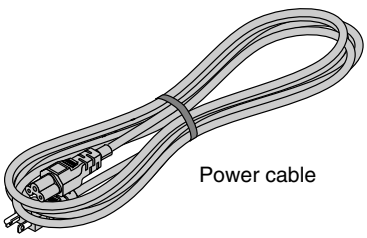


Remote control



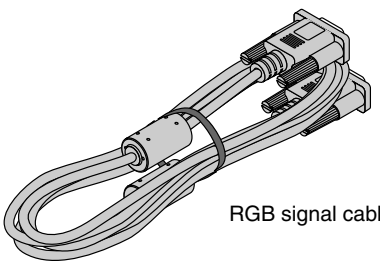
String and rivet

Remote mouse receiver

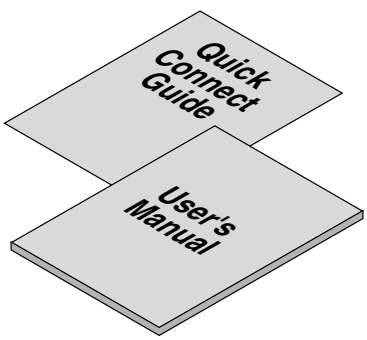


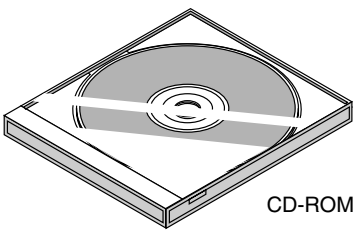
Power cable

PS/2 adapter



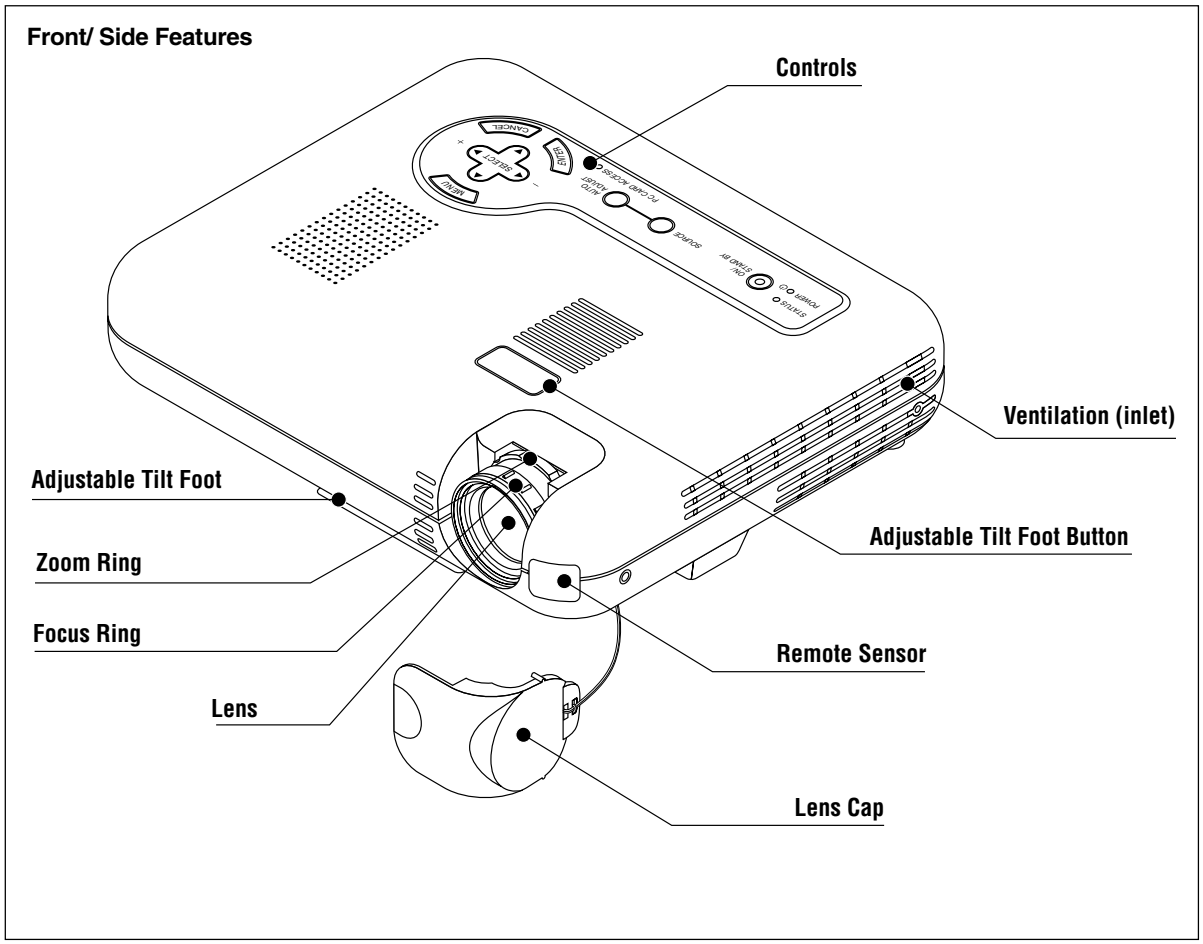
RGB signal cable





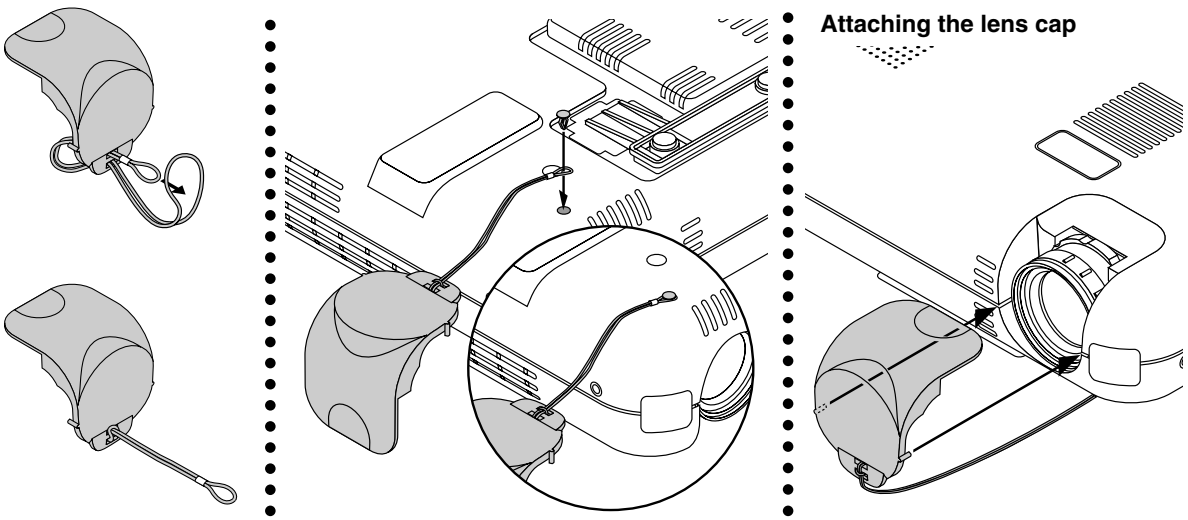
CD-ROM

Getting to Know Your LT150Z Projector

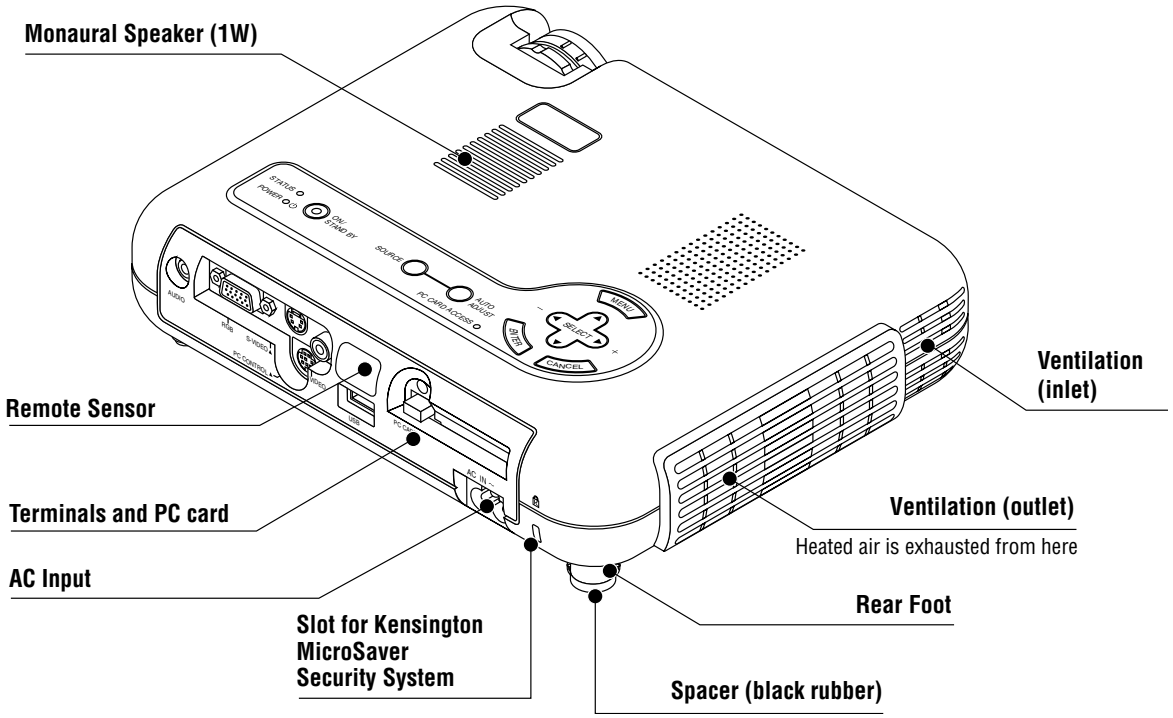


Attaching the lens cap to the bottom with the supplied string and rivet

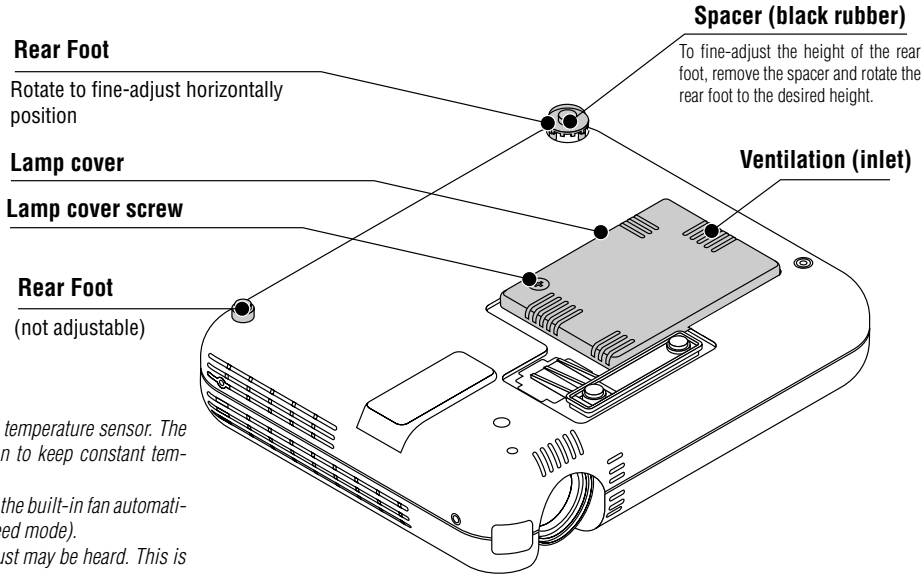
1. Thread the string through the hole on the lens cap and then tie a knot in the string.
2. Use the rivet to attach the string to the bottom of the projector.



Rear/ Side Features



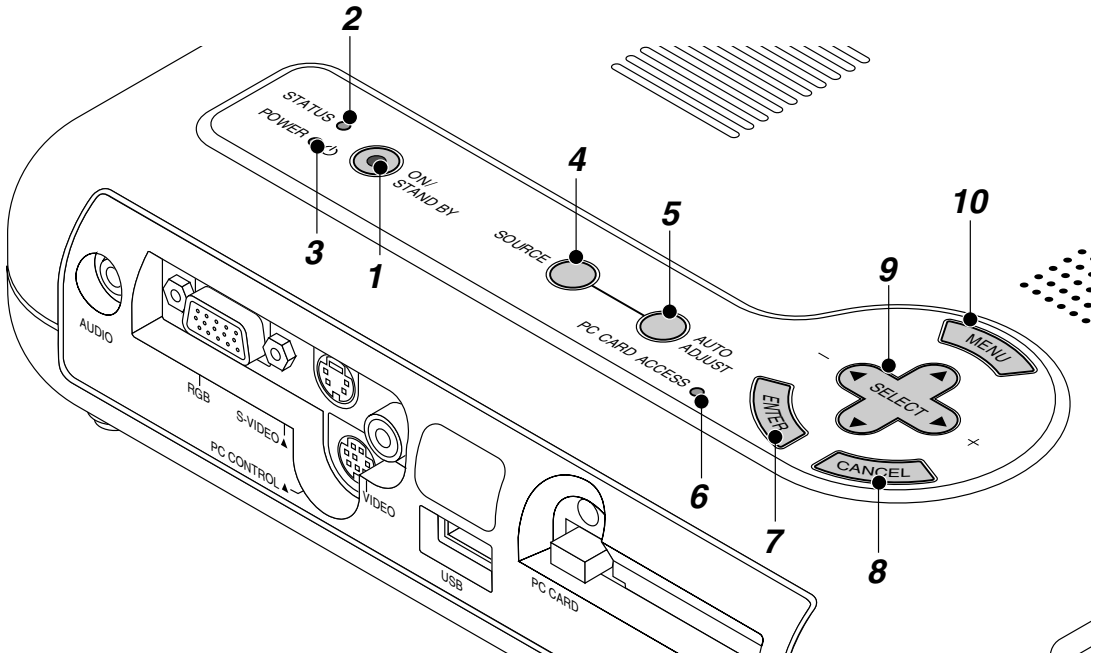
Bottom



Rear Foot
Rotate to fine-adjust horizontally position
Lamp cover
Lamp cover screw
Rear Foot
(not adjustable)
Spacer (black rubber)
To fine-adjust the height of the rear foot, remove the spacer and rotate the rear foot to the desired height.
Ventilation (inlet)

NOTE: The projector has an internal temperature sensor. The sensor controls the speed of the fan to keep constant temperature in the inside.
When the internal temperature rises, the built-in fan automatically runs at a high speed (high-speed mode).
During this time, the sound of exhaust may be heard. This is not a malfunction.

Top Features



1. Power Button (ON / STAND BY)

Use this button to turn the power on and off when the power is supplied and the projector is in standby mode.

NOTE: To turn off the projector, press and hold this button for a minimum of two seconds.

2. Status Indicator

When this is lit red continually, it's warning you that the projection lamp has exceeded 1000 hours (1500 hours in Eco mode) of service. After this light appears, it is advisable to replace the projection lamp as soon as possible. (See page E-49). In addition the message **"The lamp has reached the end of its usable life. Please replace the lamp!!."** appears continually until the lamp is replaced. If this light blinks red rapidly, it indicates that the lamp cover is not attached properly or the projector is overheated.

See the Power/Status Light Messages on page E-50 for more details.

3. Power Indicator (⏻)

When this indicator is green, the projector is on; when the indicator is orange, it is in standby mode.

4. Source Button

Use this button to select a video source such as a PC, VCR, DVD player or PC Card Viewer (CompactFlash card).

Each time this button is pressed, the input source will change as follows:

→ RGB → Video → S-Video → PC Card Viewer →

If no input signal is present, the input will be skipped.

5. Auto Adjust Button (RGB only)

Use this button to adjust Position-H/V and Pixel Clock/Phase for an optimal picture. Some signals may not be displayed correctly or take time to switch between sources.

6. PC Card Access Indicator

Lights while accessing a CompactFlash memory card.

7. Enter Button

Executes your menu selection and activates items selected from the menu.

8. Cancel Button

Press this button to exit "Menus". Press this button to return the adjustments to the last condition while you are in the adjustment or setting menu.

9. Select (▲▼◀▶) / Volume (+) (–) Buttons

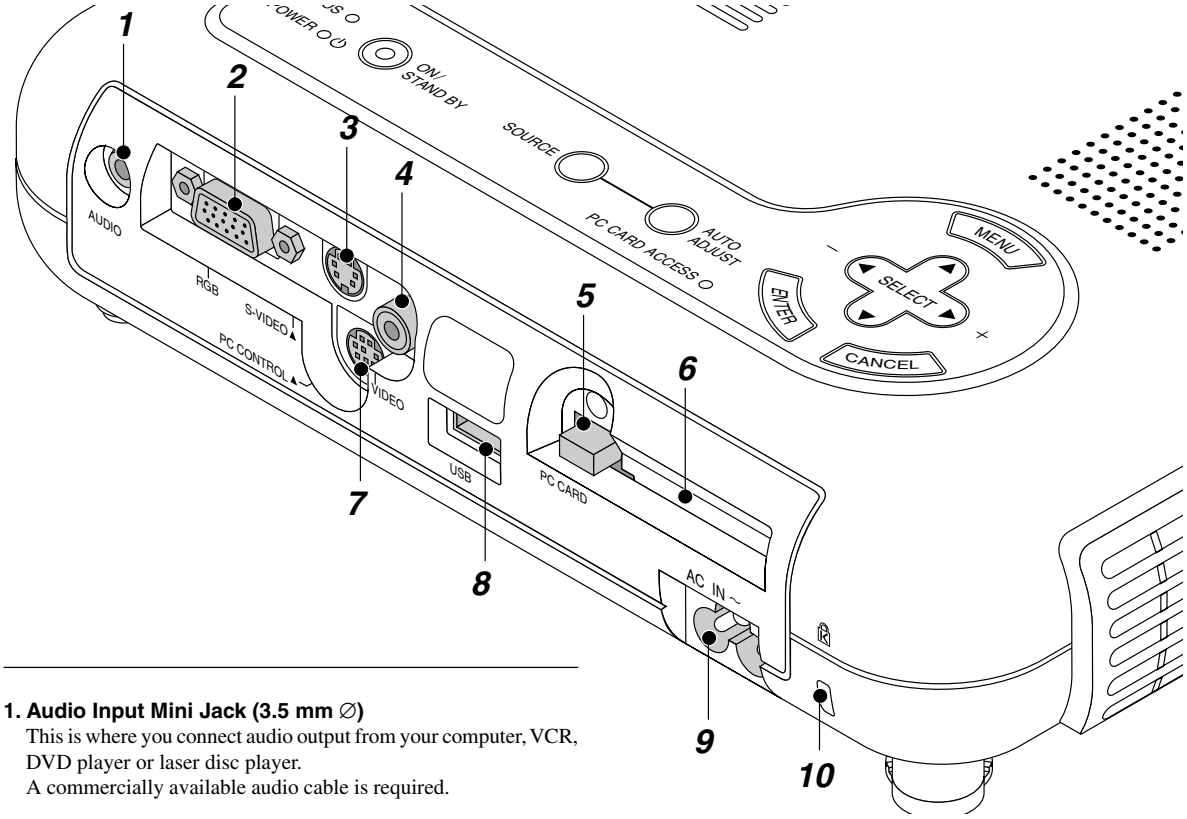
▲▼: Use these buttons to select the menu of the item you wish to adjust.
When no menus appear, these buttons work as a volume control.

◀▶: Use these buttons to change the level of a selected menu item.
A press of the ▶ button executes the selection.
When the menus or the Viewer tool bar is not displayed, these buttons can be used to select a slide, or to move the cursor in Folder List or Slide List.
When the pointer is displayed, these ▲▼◀▶ buttons move the pointer.

10. Menu Button

Displays the menu.

Terminal Panel Features



1. Audio Input Mini Jack (3.5 mm ∅)
This is where you connect audio output from your computer, VCR, DVD player or laser disc player.
A commercially available audio cable is required.

2. RGB Input/ Component Input Connector (Mini D-Sub 15 pin)
Connect your PC or other RGB equipment such as IBM or compatible computers. Use the supplied RGB cable to connect to a PC. Or connect a Macintosh computer here using the supplied RGB cable. This also serves as a component input connector that allows you to connect a component video output of component equipment such as a DVD player.

3. S-Video Input (Mini DIN 4 Pin)
Here is where you connect the S-Video input from an external source like a VCR.
NOTE: S-Video provides more vivid color and higher resolution than the traditional composite video format.

4. Video Input (RCA)
Connect a VCR, DVD player, laser disc player, or document camera here to project video.

5. PC Card Eject Button
Press to eject a CompactFlash memory card.

6. PC Card Slot
Insert a CompactFlash memory card here.

7. PC Control Port (Mini DIN 8 Pin)
Use this port to connect your PC to control your projector via a serial cable. This enables you to use your PC and serial communication protocol to control the projector. The NEC optional serial cable is required to use this port. Also PC Control Utility 1.0 included in the supplied CD-ROM must be installed on your PC.
If you are writing your own program, typical PC control codes are on page E-56.
A cap is put on the port at the factory. Remove the cap when using the port.

8. USB Terminal
Connect a commercially available mouse that supports USB. You can operate the menu or PC Card Viewer with the USB mouse via this terminal.
Note that this terminal is not used with a computer and that there may be some brands of USB mouse that the projector does not support.

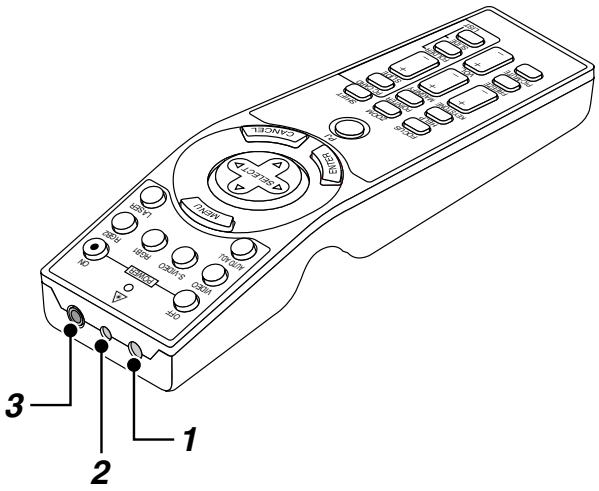
9 AC Input
Connect the supplied power cable's three-pin plug here. When you plug the other end into an active wall outlet, the POWER indicator turns orange and the projector is in standby mode.

10 Built-in Security Slot ( )
This security slot supports the MicroSaver® Security System.
MicroSaver® is a registered trademark of Kensington Microware Inc.
The logo is trademarked and owned by Kensington Microware Inc.

Remote Control Features

NOTE: *If you are using a Macintosh computer, you can click either the right-click or left-click button to activate the mouse.*

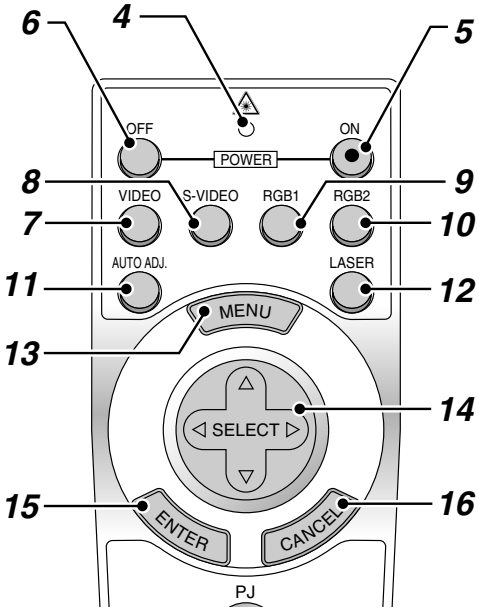
NOTE: *If any one of the buttons is pressed and held for 60 seconds or more, the button operations will cease to operate. This is not a malfunction, rather it is a feature used to prolong battery power. To cancel this feature, press any one of the buttons other than the SELECT button.*



1. Infrared Transmitter
Direct the remote control toward the remote sensor on the projector cabinet.

2. Laser Pointer
Beams a laser light when "Laser" button is pressed.

3. Remote Jack
Not available on this model.



4. LED
Flashes when any button is pressed.

5. Power ON Button
If the main power is applied, you can use this button to turn your projector on.

6. Power OFF Button
If the main power is applied, you can use this button to turn your projector off.

NOTE: *To turn off the projector, press and hold the POWER OFF button for a minimum of two seconds.*

7. VIDEO Button
Press this button to select an NTSC, PAL, SECAM or NTSC4.43 compatible video source from a VCR, DVD player, laser disc player or document camera.

8. S-VIDEO Button
Press this button to select an S-Video source from a VCR.

9. RGB 1 Button
Press this button to select a video source from computer or component equipment connected to your RGB port.

10. RGB 2 Button
Not available on this model.

11. AUTO ADJ Button
Use this button to adjust an RGB source for an optimal picture. Some signals may not be displayed correctly or take time to switch between sources.

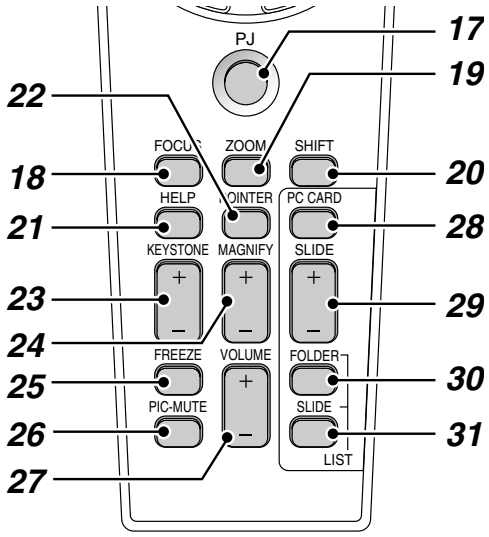
12. LASER Button
Press and hold this button to activate the laser pointer. When lit, you can use the laser to draw your audience's attention to a red dot that you can place on any object.

13. MENU Button
Displays the menu for various settings and adjustments.

14. SELECT (▲▼◄►) (Mouse) Button
When you are in the Computer mode, these buttons work as a computer mouse.
When you are in the Projector mode, which is indicated by lighting the PJ button:
▲▼: Use these buttons to select the menu of the item you wish to adjust.
◄►: Use these buttons to change the level of a selected menu item. A press of the ► button executes the selection.
When the pointer is displayed, these ▲▼◄► buttons move the pointer.

15. ENTER (Left Click) Button
When you are in the Computer mode, this button works as the mouse left button.
When this button is pressed and held for a minimum of 1.5 seconds, the drag mode is set.
When you are in the Projector mode, which is indicated by lighting the PJ button:
Use this button to enter your menu selection. It works the same way as the "Enter" button on the cabinet.

16. CANCEL (Right Click) Button
When you are in the Computer mode, this button works as the mouse right button.
When you are in the Projector mode, which is indicated by lighting the PJ button:
Press this button to exit "Menus". It works the same way as the “Cancel” button on the cabinet.



17. PJ Button
Press this button to switch the Select, Cancel, and Enter buttons between the Projector mode (lit red) and the Computer mode. Press this button or any one of the Power ON/OFF, Menu, Help, Pointer, Magnify, PC Card, Folder List or Slide List buttons to switch to the Projector mode and the PJ button lights red. To switch back to the Computer mode, press the PJ button again.

18. FOCUS Button
Not available on this model.

19. ZOOM Button
Not available on this model.

20. SHIFT Button
Not available on this model.

21. HELP Button
Provides information about operation and adjustment procedures or the set information for the current menu or adjustment during menu operation.

22. POINTER Button
Press this button to display one of the eight pointers; press again to hide the pointer. You can move your pointer icon to the area you want on the screen using the Select button.

23. KEYSTONE (+) (–) Button
Press the (+) or (–) button to correct the keystone (trapezoidal) distortion, and make the image square.

24. MAGNIFY (+) (–) Button
Use this button to adjust the image size up to 400%.
When the pointer is displayed, the image is magnified about the center of the pointer. When the pointer is not displayed, the image is magnified about the center of the screen.
When the image is magnified, the pointer is changed to the magnifying icon.

25. FREEZE Button
This button will freeze a picture. Press again to resume motion.

26. PICTURE MUTE Button
This button turns off the image and sound for a short period of time. Press again to restore the image and sound.
NOTE: When the menu is displayed, a press of this button mutes an image and sound without turning off the menu.

27. VOLUME (+) (–) Button
Press (+) to increase the volume and (–) to decrease it.

28. PC CARD Button
Press this button to select the PC Card Viewer source.

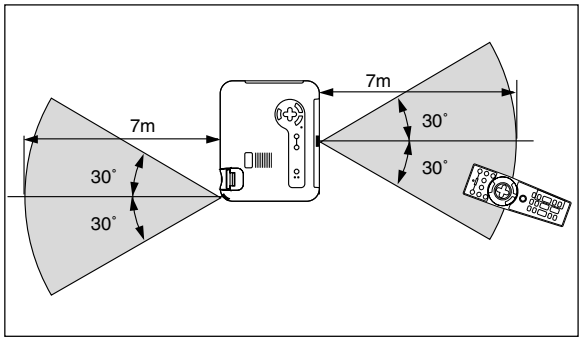
29. SLIDE (+) (–) Button
Press (+) to select the next folder or slide and (–) to select the previous folder or slide.

30. FOLDER LIST Button
Press this button to select PC Card Viewer source to display a list of folders included in a CompactFlash card.

31. SLIDE LIST Button
Press this button to select PC Card Viewer source to display a list of slides included in a CompactFlash card.

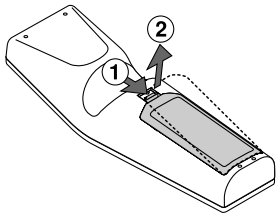
***NOTE:** The default is the Computer mode, which allows you to use the Select, Cancel, and Enter buttons as your computer mouse. When the POWER ON/OFF, MENU, HELP, POINTER, MAGNIFY, PC CARD, FOLDER LIST, or SLIDE LIST button is pressed, the PJ button lights red to indicate that you are in the Projector mode. If no buttons are pressed within 10 seconds, the light goes out and the Projector mode is canceled.*

Operating Range

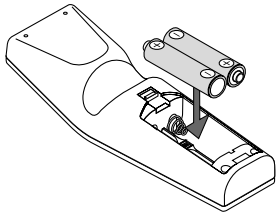


Remote Control Battery Installation

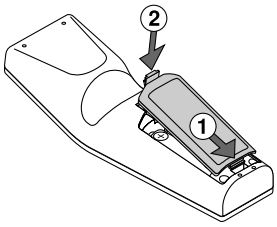
1. Press firmly and slide the battery cover off.



2. Remove both old batteries and install new ones (AA). Ensure that you have the batteries' polarity (+/–) aligned correctly.



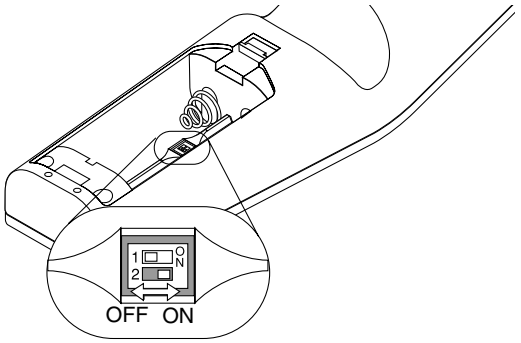
3. Slip the cover back over the batteries until it snaps into place.



Do not mix different types of batteries or new and old batteries.

Note on Remote Control Operation:
Pressing and holding the Select (▲, ▼, ◀, ▶)/ Mouse button while installing new batteries may cause malfunction or no operation. Should this happen, remove the batteries and then install them again without touching the Select/Mouse button.

Setting the function switch



There are two switches on the bottom of the battery case: an applicable projector selector switch (1) and laser enable/disable switch (2). Check the projector being used and decide whether to enable or disable laser, then set these switches as necessary using the tip of a thin ball-point pen.
On this model, an applicable projector selector switch (1) is not used.

Switch (2)
On: Enabled (the laser lights when the LASER button is pressed) [Factory default]
Off: Disabled (the laser does not light even when the LASER button is pressed)
Disable the laser when using in an environment in which the unit is accessible to children.

Remote Control Precautions
- Handle the remote control carefully.
- If the remote control gets wet, wipe it dry immediately.
- Avoid excessive heat and humidity.
- If you will not be using the remote control for a long time, remove the batteries.
- Do not place the batteries upside down.
- Do not look into the laser pointer while it is on.
- Do not point the laser beam at a person.

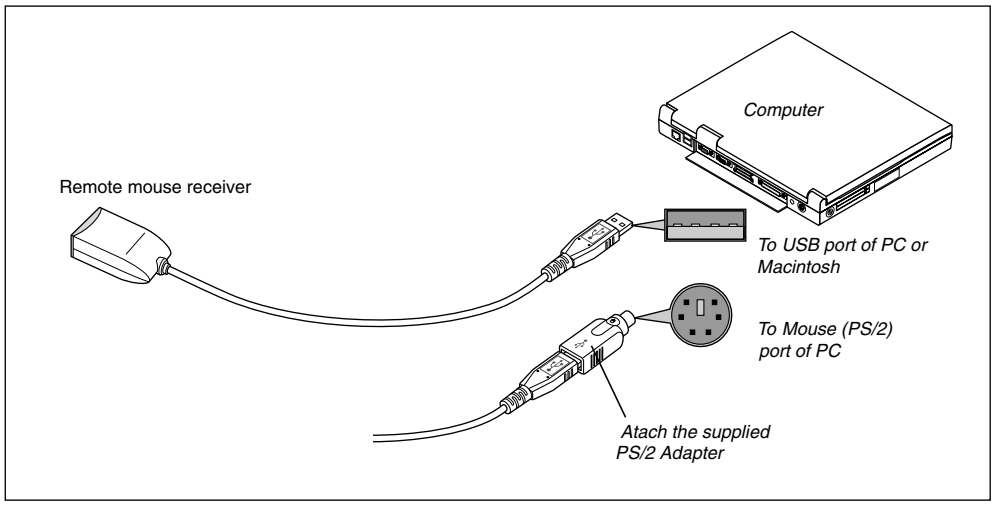
Using Remote Mouse Receiver

The remote mouse receiver enables you to operate your computer's mouse functions from the remote control (Computer mode). It is a great convenience for clicking through your computer-generated presentations.To return to the Projector mode, press the PJ button (lit red).

Connecting the remote mouse receiver to your computer

If you wish to use the remote mouse function, connect the mouse receiver and computer.
The mouse receiver can be connected directly to the computer using the USB terminal.
To connect it to the computer using the mouse (PS/2) terminal, do so using the PS/2 adapter.

NOTE: *Depending on the type of connection or OS installed on your computer, you may have to restart your computer or change your computer settings.*



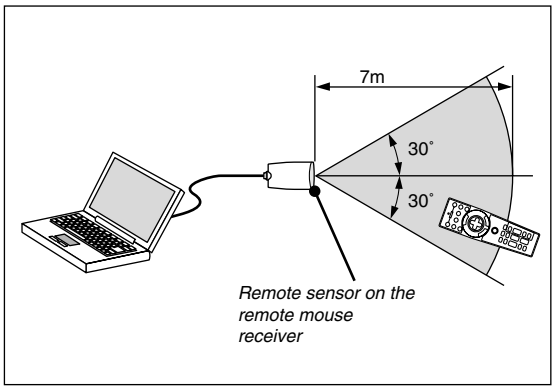
When connecting using the USB terminal

For PC, the mouse receiver can only be used with a Windows 98, Windows ME or Windows 2000 operating system.

NOTE:

- Wait at least 5 seconds after disconnecting the mouse receiver before reconnecting it and vice versa. The computer may not identify the mouse receiver if it is repeatedly connected and disconnected in rapid intervals.
- When using the PS/2 adapter, be sure to attach the PS/2 adapter to the remote mouse receiver first. Do not connect or disconnect the USB connector of the remote mouse receiver with the PS/2 adapter on the mouse (PS/2) port of your PC. Doing so can result in your PC failing to detect the remote mouse receiver.

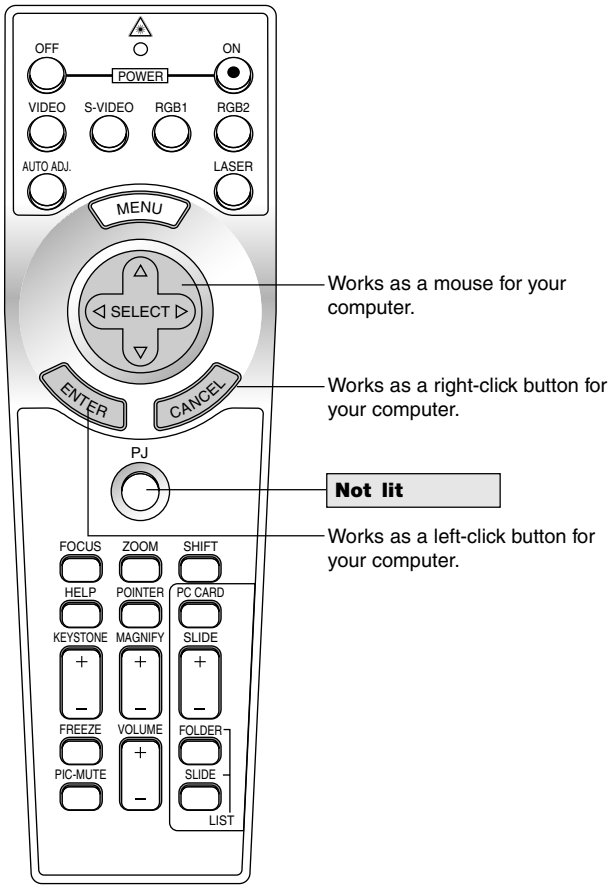
When operating a computer via the remote mouse receiver

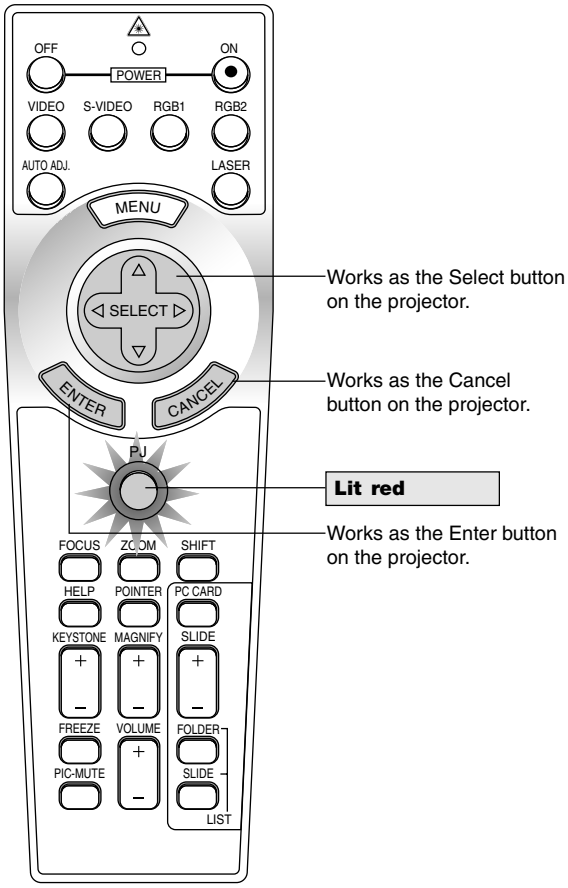


Switching operation mode between computer and projector

The three shaded buttons shown on the drawing work as a computer mouse in the Computer mode.
In the Computer mode the PJ button is not lit.

- When the MENU button is pressed, the PJ button lights red to indicate that you are in the Projector mode, which allows the projector menu operation using the three buttons.
- When the POINTER button is pressed, the PJ button lights red to indicate that you are in the Projector mode and that the SELECT ▲▼◄ ► button works as a moving button for the POINTER or magnified image.
- If no buttons are pressed within 10 seconds, the PJ button's light goes out to indicate that you are in the Computer mode. To enable the projector menu operation again, press the PJ button to light red. To move the pointer or a magnified image again, turn off the pointer and then turn on the pointer (press the POINTER button two times).
- When the PJ button is lit, if you want to use the mouse function immediately, press the PJ button to return to the Computer mode (not lit).





During Computer mode:
During Computer mode by pressing the ENTER button for 1.5 seconds or more then releasing, the drag mode is set and the drag operation can be performed simply by pressing the SELECT (▲, ▼, ◄, ►) (mouse) button. To cancel the drag mode, press the ENTER (left click) button again or press the CANCEL (right click) button.

2. INSTALLATION

This section describes how to set up your LT150Z projector and how to connect video and audio sources.

Setting up Your Projector

Your LT150Z Projector is simple to set up and use. But before you get started, you must first:
1. Determine the image size.
2. Set up a screen or select a non-glossy white wall onto which you can project your image.
Ensure that the power cable and any other cables connecting to video sources are disconnected before moving the projector.
When moving the projector or when it is not in use, cover the lens with the lens cap.

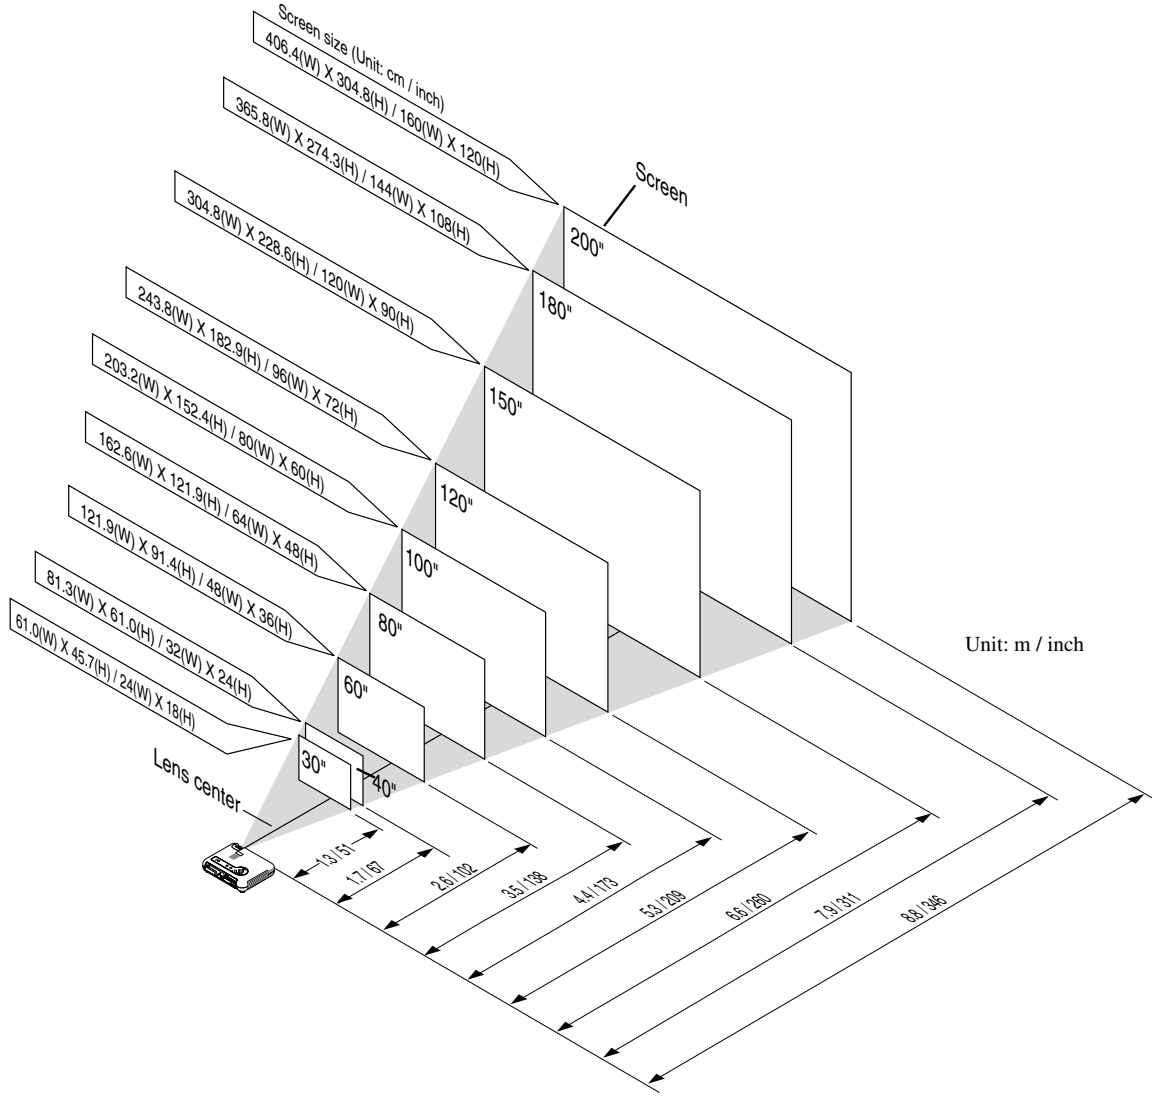
Selecting a Location

The further your projector is from the screen or wall, the larger the image. The minimum size the image can be is approximately 30" (0.8 m) measured diagonally when the projector is roughly 4 feet (1.3 m) from the wall or screen. The largest the image can be is 200" (5.1 m) when the projector is about 29 feet (8.8 m) from the wall or screen.

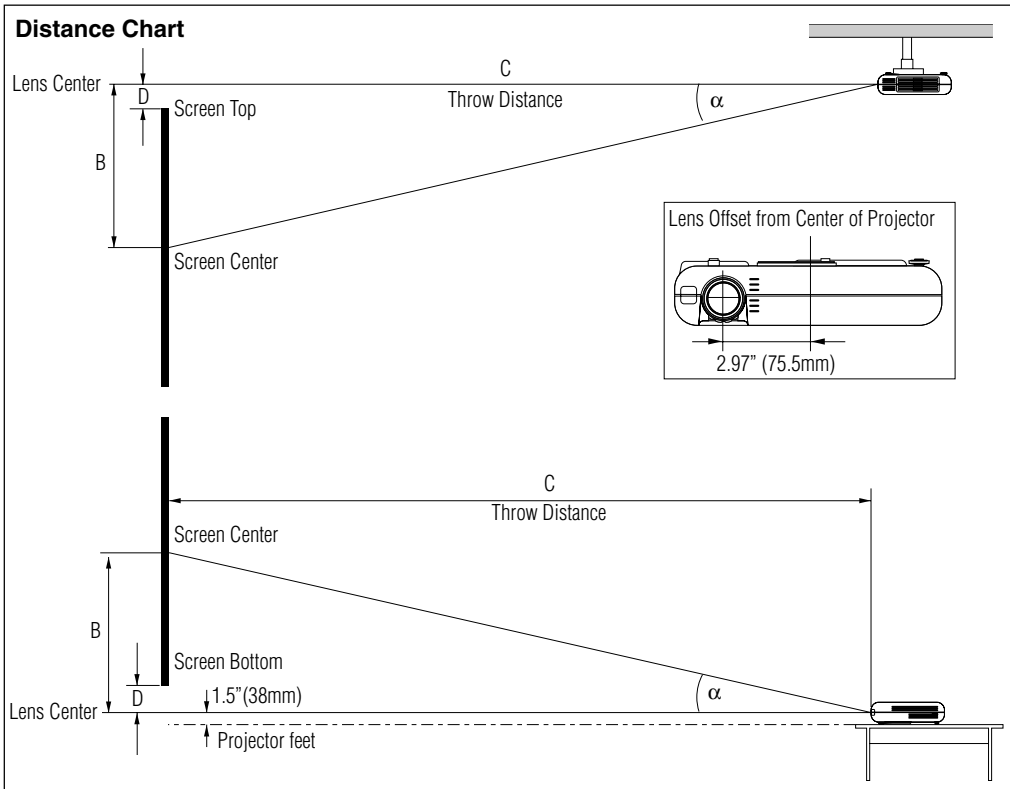
Screen and Projection Distance

The following shows the proper relative positions of the projector and screen. Refer to the table to determine the position of installation.

Throw distance



Distance Chart



B=Vertical distance between lens center and screen center
D=Vertical distance between lens center and top of screen (bottom of screen for desktop)
NOTE: Distances may vary +/-5%.

C=Throw distance
α=Throw angle

Screen Size						B		C					D		α		
Diagonal		Width		Height				Wide			Tele				Wide		Tele
inch	mm	inch	mm	inch	mm	inch	mm	inch	mm	–	inch	mm	inch	mm	degree	–	degree
30	762	24	610	18	457	12	307	46	1160	–	56	1410	3	78	14.8	–	12.3

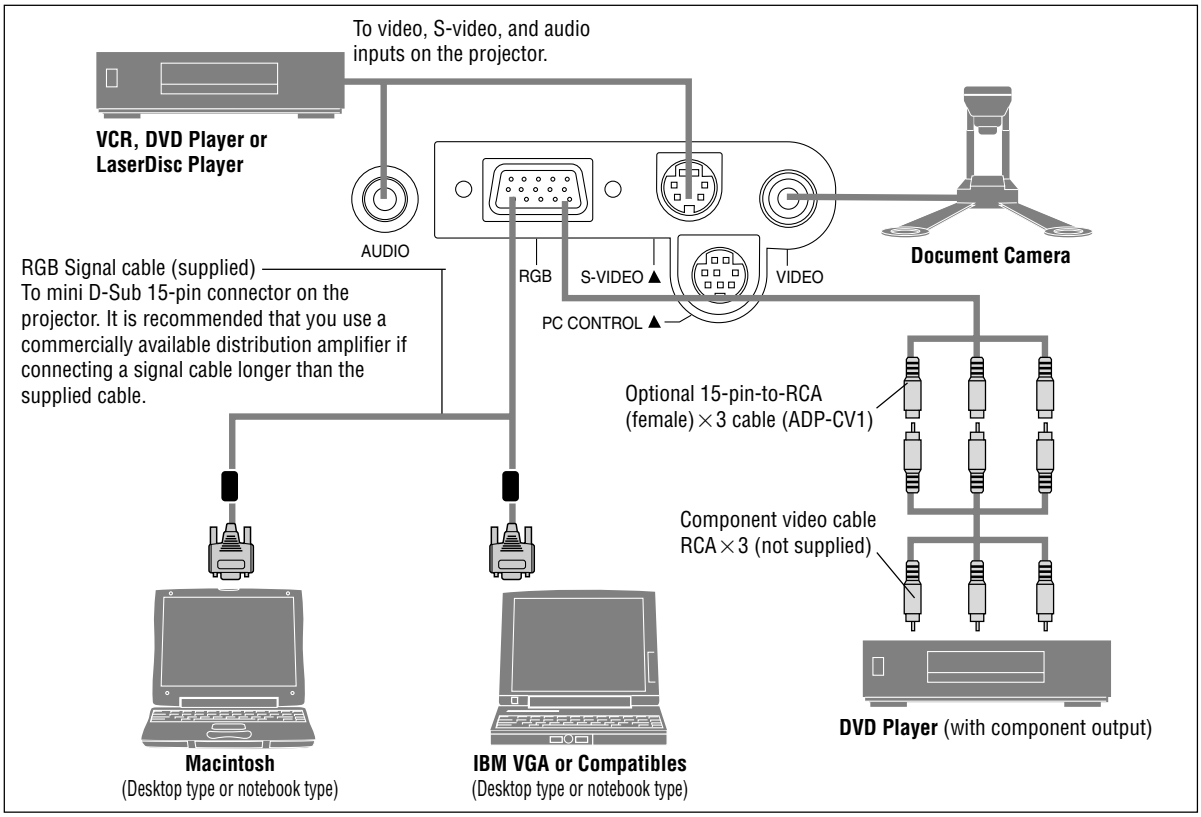
WARNING

* Installing your projector on the ceiling must be done by a qualified technician. Contact your NEC dealer for more information.
* Do not attempt to install the projector yourself.
- Only use your projector on a solid, level surface. If the projector falls to the ground, you can be injured and the projector severely damaged.
- Do not use the projector where temperatures vary greatly. The projector must be used at temperatures between 41˚F (5˚C) and 95˚F (35˚C).
- Do not expose the projector to moisture, dust, or smoke. This will harm the screen image.
- Ensure that you have adequate ventilation around your projector so heat can dissipate. Do not cover the vents on the side or the front of the projector.

Reflecting the Image

Using a mirror to reflect your projector's image enables you to enjoy a much larger image. Contact your NEC dealer if you need a mirror. If you're using a mirror and your image is inverted, use the "Menu" and "Select" buttons on your projector cabinet or ▲▼ buttons on your remote control to correct the orientation. (See page E-37.)

Wiring Diagram



To video, S-video, and audio inputs on the projector.
VCR, DVD Player or LaserDisc Player
AUDIO
RGB
S-VIDEO ▲
VIDEO
PC CONTROL ▲
Document Camera
RGB Signal cable (supplied)
To mini D-Sub 15-pin connector on the projector. It is recommended that you use a commercially available distribution amplifier if connecting a signal cable longer than the supplied cable.
Optional 15-pin-to-RCA (female) × 3 cable (ADP-CV1)
Component video cable RCA × 3 (not supplied)
DVD Player (with component output)
Macintosh
(Desktop type or notebook type)
IBM VGA or Compatibles
(Desktop type or notebook type)

NOTE: When using with a notebook PC, be sure to connect between the projector and the notebook PC before turning on the power to the notebook PC. In most cases signal cannot be output from RGB output unless the notebook PC is turned on after connecting with the projector.

NOTE:

** If the screen goes blank while using your remote control, it may be the result of the computer's screen-saver or power management software.*

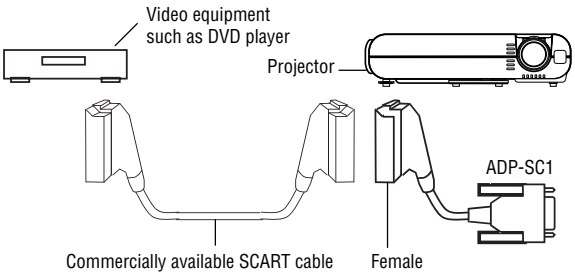
** If you accidentally hit the POWER button on the remote control, wait 90 seconds and then press the POWER button again to resume.*

NOTE: If using video, S-video, or audio cables, the cables should be 3 m (9.8 feet) or shorter.

To connect SCART output (RGB)

Before connections: An exclusive SCART adapter (ADP-SC1) and a commercially available SCART cable are required for this connection.

***NOTE:** Audio signal is not available for this connection.*



1. Turn off the power to the projector and your video equipment.
2. Use the NEC ADP-SC1 SCART adapter and a commercially available SCART cable to connect the RGB input of your projector and a SCART output (RGB) of your video equipment.
3. Turn on the power to the projector and your video equipment.
4. Use the RGB button on the remote control to select the RGB input.
5. Press the MENU button on the remote control to display the menu.
6. From the Advanced menu, select [Projector Options] → [Setup] → [Signal Select RGB] → [Scart].

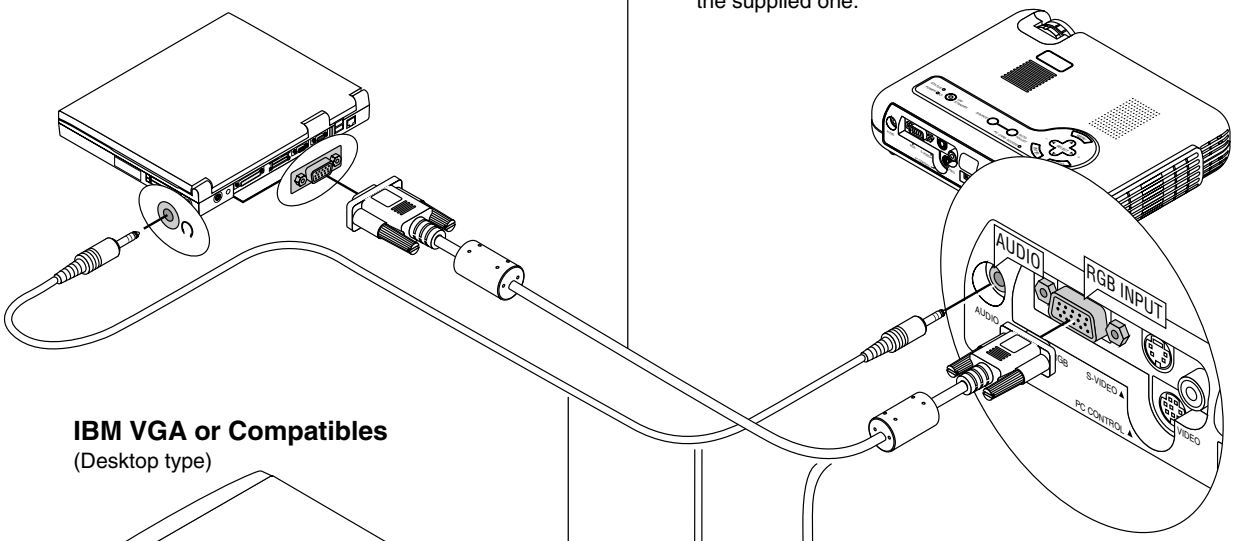
SCART is a standard European audio-visual connector for TVs, VCRs and DVD players. It is also referred to as Euro-connector.

***NOTE:** The ADP-SC1 SCART adapter is obtainable from your NEC dealer in Europe.*
Contact your NEC dealer in Europe for more information.

Connecting Your PC or Macintosh Computer

IBM VGA or Compatibles (Notebook type)
or
Macintosh (Notebook type)

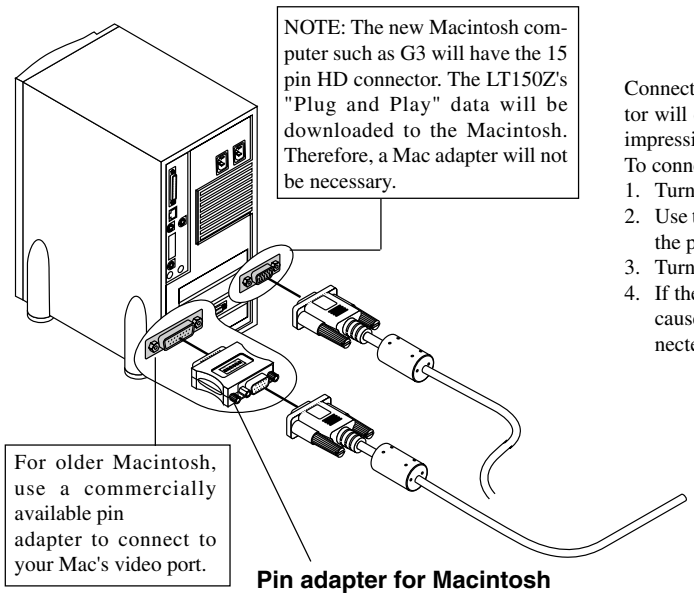
RGB signal cable (supplied)
To mini D-Sub 15-pin connector on the projector. It is recommended that you use a commercially available distribution amplifier if connecting a signal cable longer than the supplied one.



IBM VGA or Compatibles
(Desktop type)

Audio cable
(not supplied)

Macintosh (Desktop type)



NOTE: The new Macintosh computer such as G3 will have the 15 pin HD connector. The LT150Z's "Plug and Play" data will be downloaded to the Macintosh. Therefore, a Mac adapter will not be necessary.

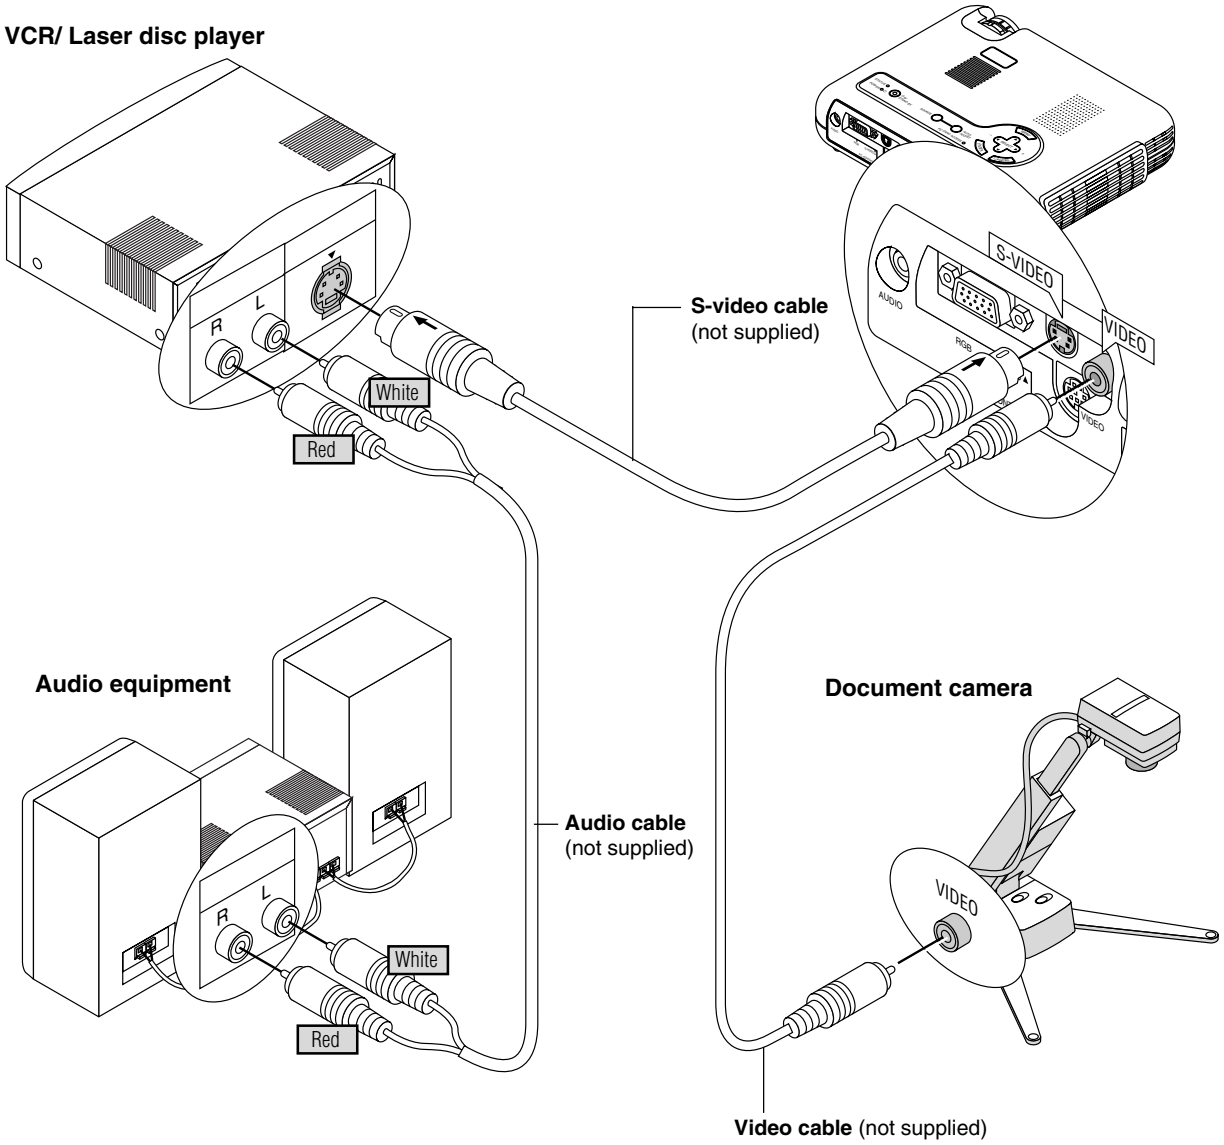
For older Macintosh, use a commercially available pin adapter to connect to your Mac's video port.

Pin adapter for Macintosh
(not supplied)

Connecting your PC or Macintosh computer to your LT150Z projector will enable you to project your computer's screen image for an impressive presentation.
To connect to a PC or Macintosh, simply:

1. Turn off the power to your projector and computer.
2. Use the supplied signal cable to connect your PC or Macintosh to the projector.
3. Turn on the projector and the computer.
4. If the projector goes blank after a period of inactivity, it may be caused by a screen saver installed on the computer you've connected to the projector.

Connecting Your VCR or Laser Disc Player



Use common RCA cables (not provided) to connect your VCR, laser disc player or document camera to your projector.
To make these connections, simply:

1. Turn off the power to the projector and VCR, laser disc player or document camera.
2. Connect one end of your RCA cable to the video output connector on the back of your VCR or laser disc player, connect the other end to the Video input on your projector. Use an audio cable (not supplied) to connect the audio from your VCR or laser disc player to your audio equipment (if your VCR or laser disc player has this capability). Be careful to keep your right and left channel connections correct for stereo sound.
3. Turn on the projector and the VCR or laser disc player.

NOTE: Refer to your VCR or laser disc player owner's manual for more information about your equipment's video output requirements.

NOTE:

- *The LT150Z is not compatible with video decoded outputs of ISS-6020 and ISS-6010.*
- *An image may not be displayed correctly when a Video or S-Video source is played back in fast-forward or fast-rewind via a scan converter.*

About Startup screen (Menu Language Select screen)

When you first turn on the projector, you will get the Startup screen. This screen gives you the opportunity to select one of the seven menu languages: English, German, French, Itilan, Spanish,Swedish and Japanese.

To select a menu language, follow these steps:

1. Use the Select ▲ or ▼ button to select one of the seven languages for the menu.

2. Press the Enter button to execute the selection.

3. The Basic/Custom menu will be displayed in the language you have selected.

To close the menu, press the Cancel button.

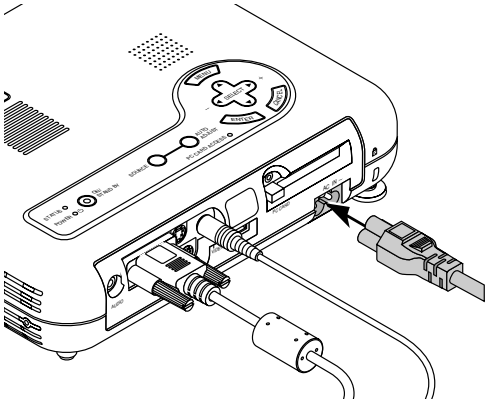
After this has been done, you can proceed to the advanced menu operation.
If you want, you can select the menu language later. See "Language" on page E-36.

3.OPERATION

Connecting the Power Cable and Turn on the Projector

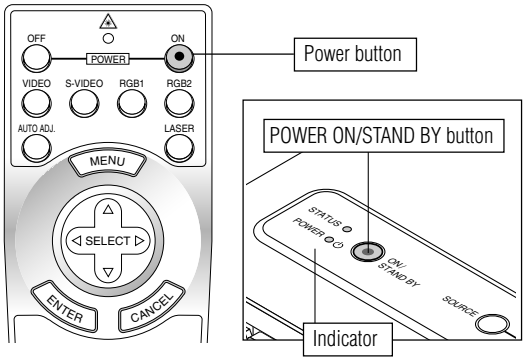
Before you turn on your projector, ensure that the computer or video source is turned on and that your lens cap is removed.

1 Connect the supplied power cable to the projector.



Plug the supplied power cable in the wall outlet. The projector will go into its standby mode and the power indicator will glow orange.

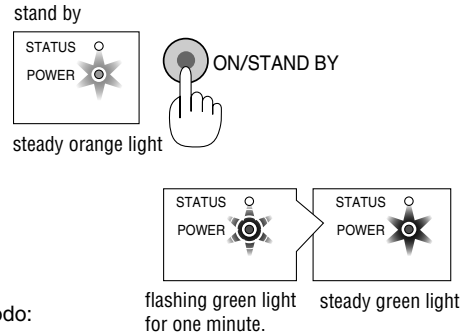
2 Turn on and off the Projector



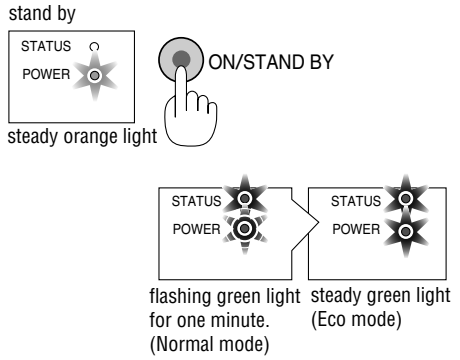
To turn on the projector:
Only after you press the "ON/STAND BY" button on the projector cabinet or "POWER ON" button on the remote control will the power indicator turn to green and the projector become ready to use.
NOTE: To turn the projector on by plugging in the power cable, use the menu and enable the "Auto Start" feature. (See page E-39.)
NOTE: Immediately after turning on the projector, screen flicker may occur. This is not a fault. Wait 3 to 5 minutes until the lamp lighting is stabilized.
To turn off the projector:
First press the Power (ON/STAND BY) button on the projector cabinet or the POWER OFF button on the remote control for a minimum of two seconds. The power indicator will glow orange. After the projector turns off, the cooling fans keep operating for 90 seconds.
NOTE: Do not disconnect the power cable during this time. Then, unplug the power cable. The power indicator will go out.

Status of indicator light: turn on

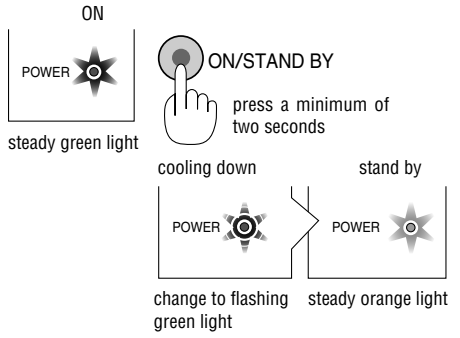
Normal mode:



Eco modo:

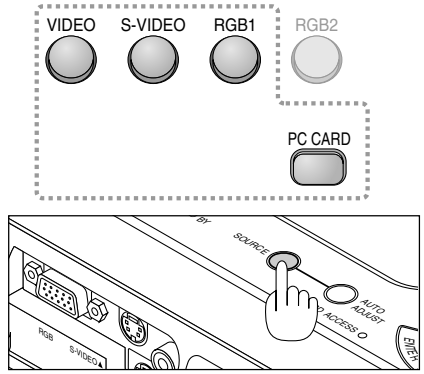


Status of indicator light: turn off



3 Adjust a Projected Image

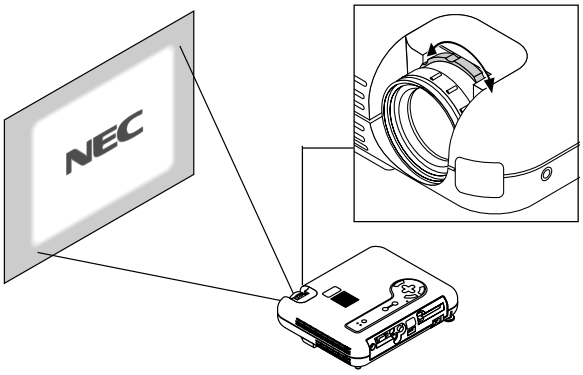
Select the Computer or Video Source



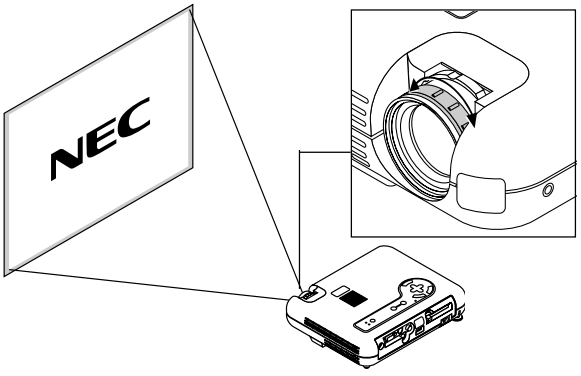
Press the Source button on the remote control or the projector cabinet to select "Video" (VCR, document camera, or laser disc player), S-Video", "RGB" (computer or DVD with component output) or "PC Card Viewer" (slides on a CompactFlash card) to display the image.
Or press the "Menu" button on the remote control or the cabinet and use the menu to select your video source: "Video", "S-Video", "RGB" or "PC Card Viewer".
NOTE: If no input signal is available, the projector will display a blue background (factory preset).

Adjusting the Image Size and the Focus

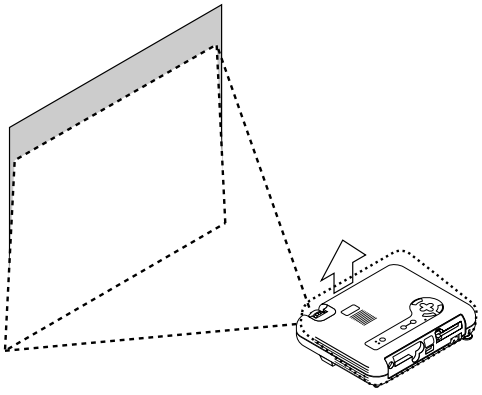
Use the Zoom ring to fine adjust the image size on the screen



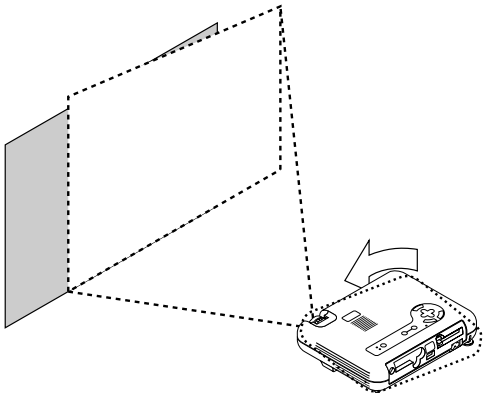
Use the Focus ring to obtain the best focus.



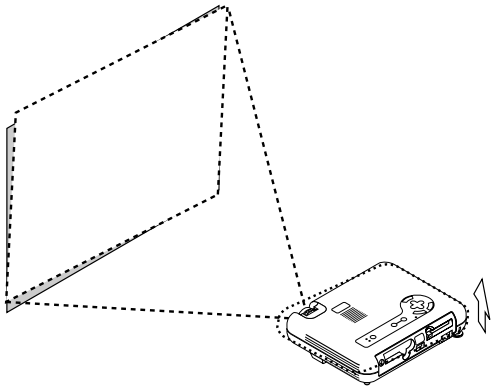
Place your projector on a flat level surface and Ensure that the projector is square to the screen.



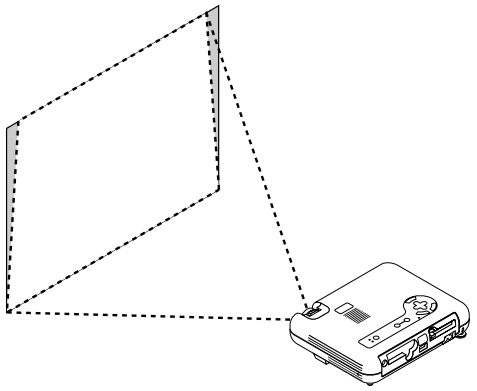
Lift the front edge of the projector to center the image vertically.



Move the projector left to center the image horizontally on the screen.



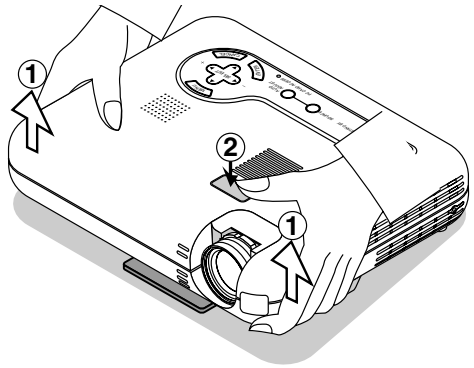
Rotate the rear foot to make the image square to the screen.



Use keystone correction for proper adjustment.

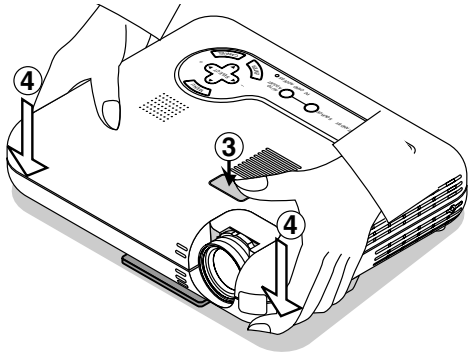
Adjust the Tilt Foot

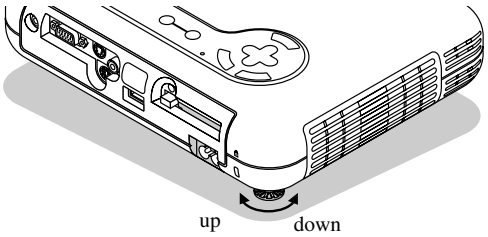
1) *Lift the front edge of the projector.*
2) *Press the Tilt button on the top of the projector to extend the adjustable tilt foot (maximum height).*



3) *Press and hold the Tilt button.*
4) *Lower the front of the projector to the desired height and release the button to lock the Adjustable tilt foot.*
There is approximately 5 degrees of up and down adjustment for the front of the projector. The rear foot height can be changed, but the vertical distance from the bottom to the desk or floor should be 0.14 " (3.5mm) to make the projector horizontal on the flat surface. To fine-adjust the height of the rear foot, remove the spacer (black rubber) and rotate the rear foot to the desired height.

* *If the projected image does not appear square to the screen then use keystone correction for proper adjustment.*



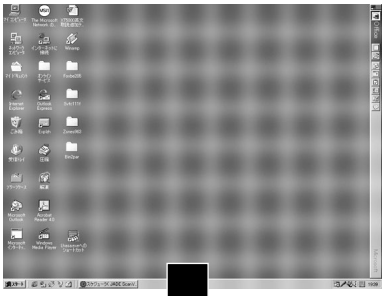


Do not use the tilt-foot for purposes other than originally intended. Misuses such as gripping the tilt-foot or hanging on the wall can cause damage to the projector.

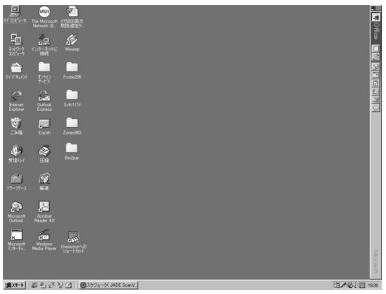
Adjusting the Image Using Auto Adjust

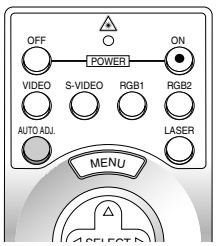
The Auto Adjust function automatically optimizes the image in RGB mode.

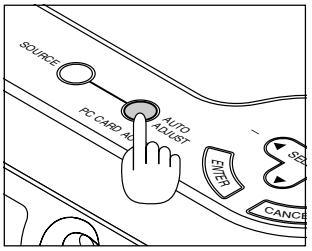
[Poor picture]



[Normal picture]



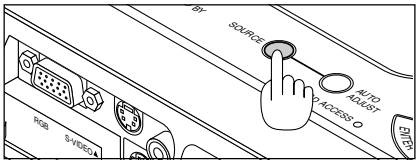




Press the Auto Adjust button to adjust Position-H/V and Pixel Clock/ Phase for an optimal picture. Some signals may not be displayed correctly or take time to switch between sources.

Basic Operation

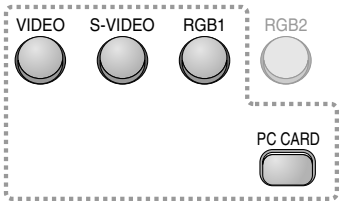
Selecting the computer or video source

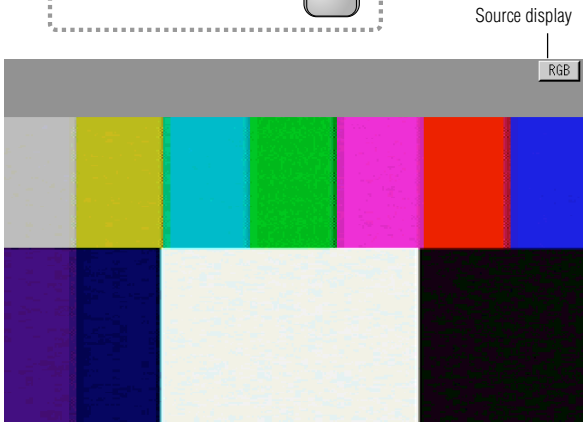


Each time the Source button is pressed, the input source will change as follows:

→ RGB → Video → S-Video → PC Card Viewer →

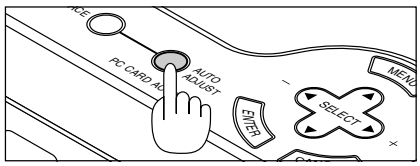
If no input signal is present, the input will be skipped.





Optimizing RGB image automatically

Press the Auto Adjust button to optimize an RGB image automatically.



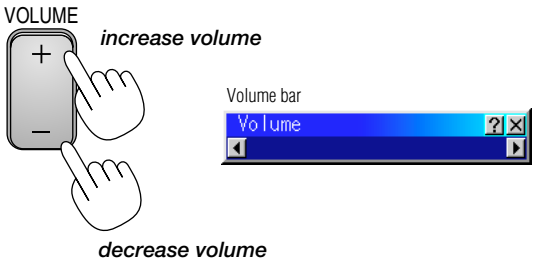
Press the Auto Adjust button to fine-tune the computer image or to remove any vertical banding that might appear and to reduce video noise, dot interference or cross talk (this is evident when part of your image appears to be shimmering). This function adjusts the clock frequencies that eliminate the horizontal banding in the image. This function also adjusts the clock phase to reduce video noise, dot interference or cross talk. (This is evident when part of your image appears to be shimmering.)

This adjustment may be necessary when you connect your computer for the first time.

NOTE: The Auto Adjust function does not work for component signal.

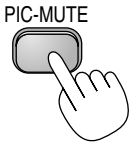
Volume control

Sound level from the speaker on the projector can be adjusted.



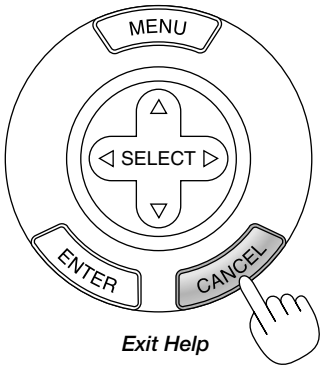
Turning off picture and sound

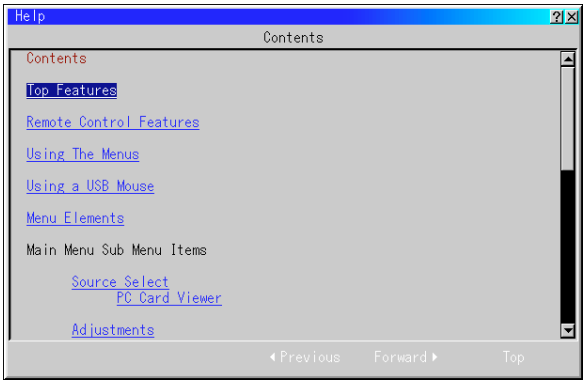
Press the Picture Mute button to turn off the image and sound for a short period of time. Press again to restore the image and sound.



Getting Help about how to operate the projector

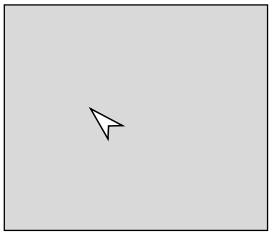
You get the contents about Help.



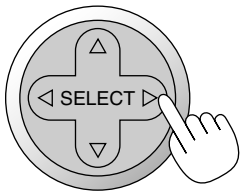


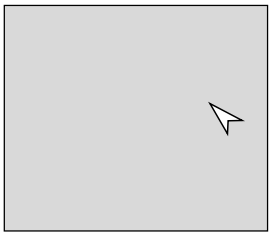
Using Pointer

You can use one of eight pointers to draw your audience's attention to the portion of a projected image you want.



Press the Pointer button to display the pointer.



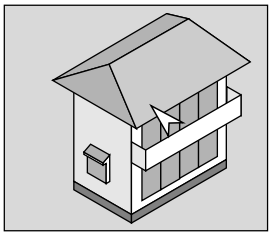


Use the Select button to move the pointer.

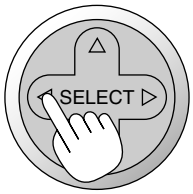
Enlarging and Moving a Picture

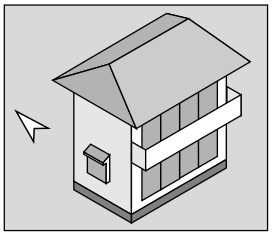
You can enlarge the area you want up to 400 percent.
To do so:

1. Press the Pointer button to display the pointer.

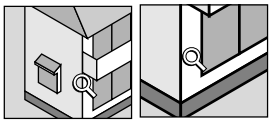


2. Move the pointer to the area you want to enlarge.

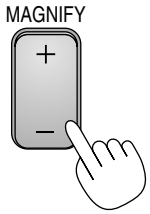


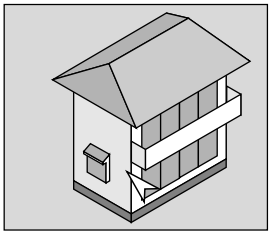


3. Enlarge the selected area.
   When the Magnify (+) button is pressed, the pointer is changed to a magnifying glass. To move the magnifying glass, use the Select button.



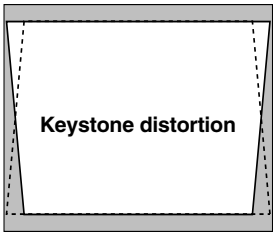
4. Return the image to the original size.

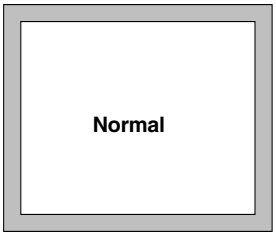




Correcting Keystone distortion

Press (+) or (-) to correct keystone (trapezoidal) distortion to make the top or bottom of the screen longer or shorter so that the projected image is rectangular.





NOTE: The keystone angle can be corrected between 30 degrees upward and 30 degrees downward at a 0 degree-projection angle.
Depending on the type of graphics being used, the picture may get blurred or keystone correction may not be possible when excessive keystone correction is used.
The idea is, the closer you are to native resolution, the better image you will see.

Freezing a picture

Press the Freeze button to freeze a picture. Press again to resume motion.

Using the Menus

NOTE: The on-screen menu may not be displayed correctly while interlaced motion video image is projected.

1. Press the "Menu" button on the remote control or projector cabinet to display the Advanced Menu or Basic/Custom Menu.
   NOTE: When using a USB mouse, click the mouse button to display the menu. For other operations, do the same way as you use your PC mouse.

2. Press the ▲▼ buttons on the remote control or the projector cabinet to highlight the menu for the item you want to adjust or set.

3. Press the ▶ button or the "Enter" button on the remote control or the projector cabinet to select a submenu or item.

4. Adjust the level or turn the selected item on or off by using "Select" ◀ or ▶ buttons on the remote control or the projector cabinet. The on-screen slide bar will show you the amount of increase or decrease.

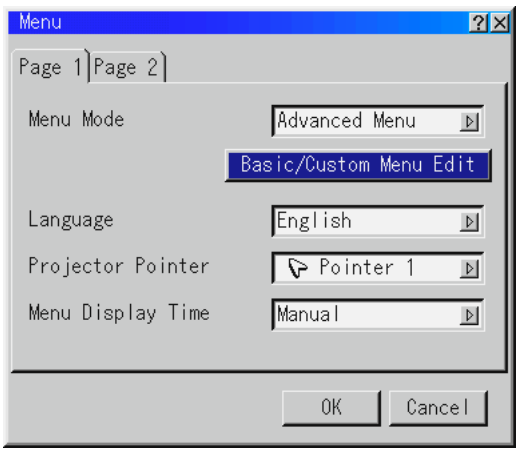
5. Changes are stored until you adjust it again.
   ENTER ..... Stores the setting or adjustments.
   CANCEL ..... Return to the previous screen without storing settings or adjustments.
   NOTE: You can close the main and sub menus simultaneously by pressing the PJ button on the remote control to cancel the Projector mode.

6. Repeat steps 2-5 to adjust an additional item, or press "Cancel" on the projector cabinet or the remote control to quit the menu display.

Customizing Basic/Custom Menu

The Basic/Custom menu can be customized to meet your requirements. Selecting a menu item from the “Basic/Custom Menu Edit” list, allows you to custom tailor the menu items to your needs.

1. Select “Basic/Custom Menu Edit” to display the “Basic/Custom Menu Edit” screen.



2. Use the Select buttons ▲ or ▼ to highlight your selection and press the Enter button to place a check mark next to an option. This action enables that feature.
   Press the Enter button again to clear the check box.

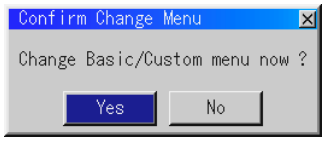
   If you select an item with a solid triangle ▶ and press the Enter button on the remote control or the projector cabinet, you can enable all the items within that submenu.
   Also you can turn on an item within the submenu without placing a check mark on the main menu item.
   NOTE: Up to 12 main menu items (within Basic/Custom Menu Edit, not including submenu items) can be selected.

3. In order for the changes to take effect, use the ◀ or ▶ button on the remote control or the projector cabinet to highlight “OK”, then press the Enter button. To cancel the changes, use the Select ▲ or ▼ buttons to highlight “Cancel” and press the “Enter” button. To return to the factory default, select “Reset” then press the “Enter” button.

   The default Basic/Custom Menu items are:
   Source Select (RGB, Video, S-Video and PC Card Viewer), Picture, Volume, Image Options (Keystone), Projector Options (Menu and Setup), Tools (Capture, PC Card Files and ChalkBoard) and Help (Contents and Information)

NOTE: Once you have selected OK on the Basic/Custom Menu Edit screen, you cannot cancel the changes on the Menu screen. However, you can re-edit the menu items over again as described in the steps above.

NOTE: If the "Advanced Menu" item has been selected on the Menu mode, you get the "Confirmation Change Menu" upon completion of "Basic/Custom Menu" editing. In this case, selecting "Yes" then "Enter" will close all the menus and apply the changes from the Advanced menu to the Basic/Custom Menu.
If you select "No" then "Enter" functions, then all menu items will return to the Advanced menu, but your changes will still be available within the "Basic/Custom Menu" selection. To display the previously tailored Basic/Custom Menu, select "Basic/Custom Menu" from the "Menu Mode".



An item "To Advanced Menu" will be added to the bottom of the Basic/Custom Menu.
Selecting this item and pressing the "Enter" button will display the "Advanced Menu" features.

Using a USB Mouse

Using a USB mouse gives you a smooth operation. A commercially available USB mouse is required.
NOTE:There may be some brands of USB mouse that the projector does not support.

Operate the Menus using the USB mouse

Mouse Cursor

When connecting a USB mouse to the projector, you get a mouse cursor on the screen.
Unless you use your USB mouse within 10 seconds, the mouse cursor disappears.

Menu Display

Clicking with a mouse button displays the menu.
Clicking ▶ displays the pull-down menu.
To close the menu, click anywhere in the background.

Adjusting and Setting Display

You can select a menu item and click with a mouse button to make adjustments and setting.

Examples

Click (or press and hold) the mouse button ◀ or ▶ to adjust the brightness.
Or click and drag the mouse button on the slide bar horizontally to adjust it.

To save the adjustments, click ☒ . The display is closed.
If you click anywhere in the background while displaying adjustment and setting menu or dialog box, you will get the main menu at the clicking point.

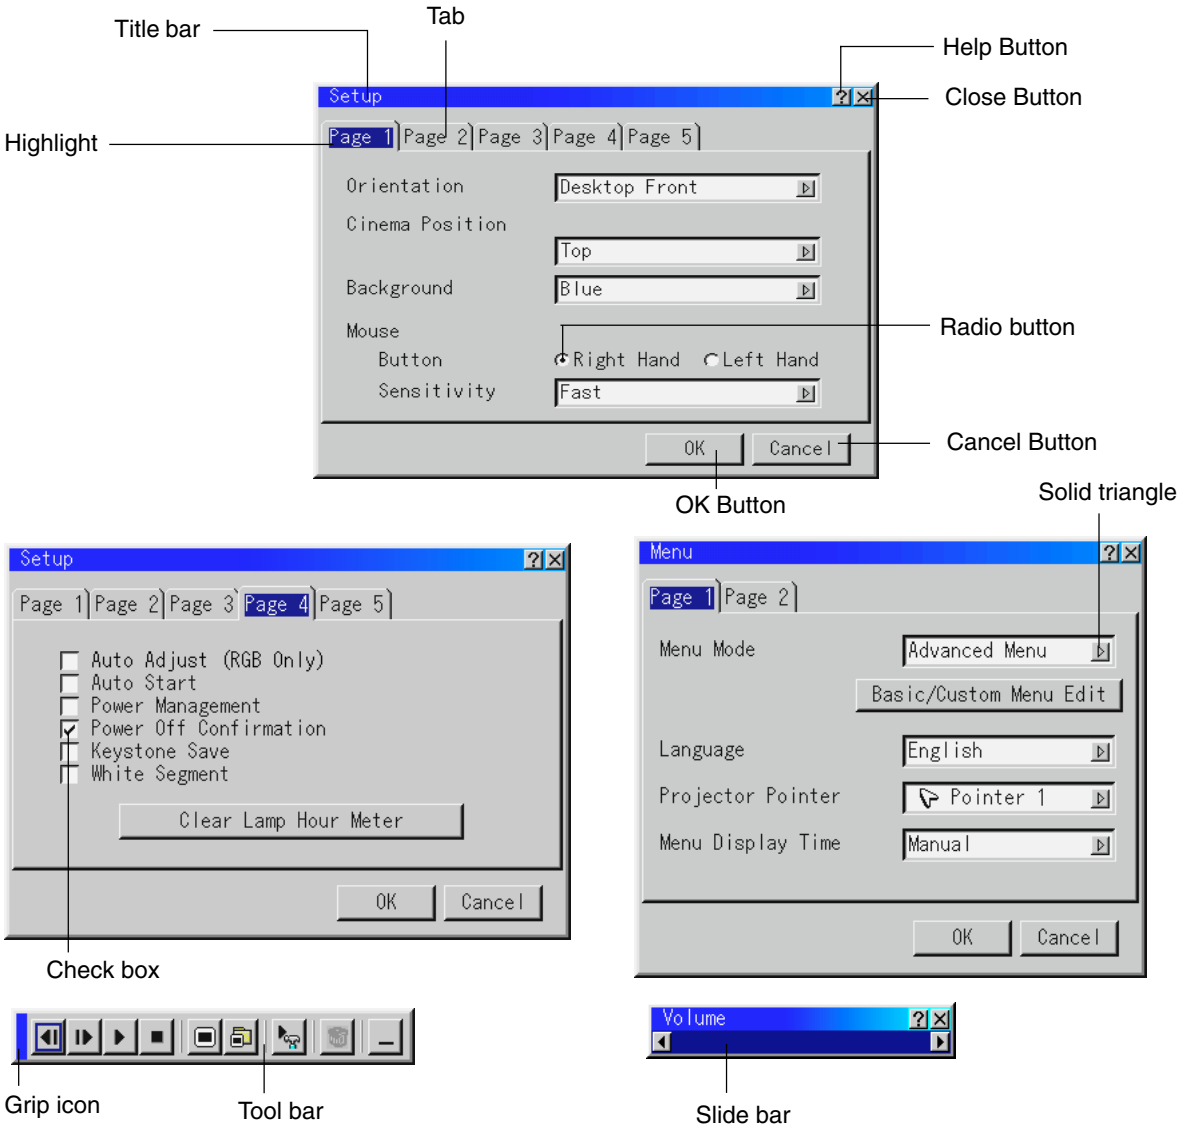
Menu Elements



Menu windows or dialog boxes typically have the following elements:

Title bar: Indicates the menu title.

Highlight: Indicates the selected menu or item.

Solid triangle: Indicates further choices are available. A highlighted triangle indicates the item is active.

Tab: Indicates a group of features in a dialog box. Selecting on any tab brings its page to the front.

Radio button: Use this round button to select an option in a dialog box.

Check box: Place a checkmark in the square box to turn the option On.

Slide bar: Indicates settings or the direction of adjustment.

OK button: Press to confirm your setting. You will return to the previous menu.

Cancel button: Press to cancel your setting. You will return to the previous menu.

Close button: Click to close the window with saving changes. (USB mouse only)

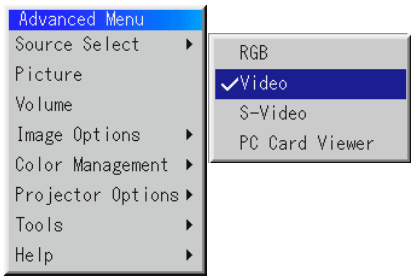
Help button: Indicates that help about that feature is available (USB mouse only). Press the Help button on the remote control to display help.

Toolbar: Contains several icons for specific tasks. It is also referred to as "launcher".

Grip icon: Point the mouse here, and click and drag to move a toolbar.

Menu Descriptions & Functions

Source Select



Enables you to select a video source such as a VCR, DVD player, laser disc player, computer or document camera depending on what is connected to your inputs.
Press the "Select" button on the projector cabinet or ▲▼ buttons on your remote control to highlight the menu for the item you want to adjust.

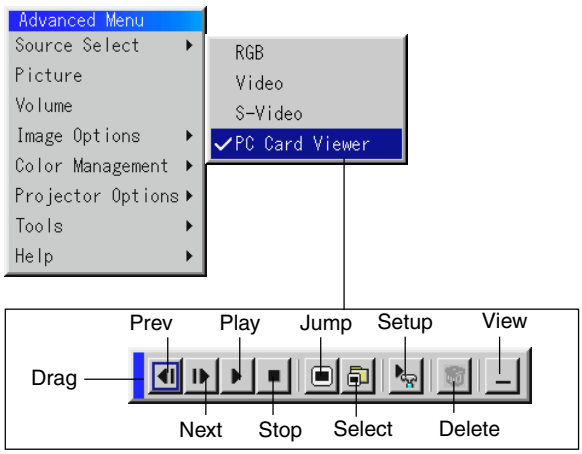
RGB
Selects the computer connected to your RGB or component signal.
NOTE: An optional component cable (Component V or ADP-CV1 cable) is needed for a component signal.

Video
Selects what is connected to your Video input-VCR, laser disc player, DVD player or document camera.

S-Video
Selects what is connected to your S-Video input-VCR, DVD player, or laser disc player.
NOTE: A frame may freeze for a brief period of time when a video is played back in fast-forward or fast-rewind with a Video or S-Video source.

PC Card Viewer
This feature enables you to make presentations using a CompactFlash card that contains captured images and slides created with the exclusive PC Card Viewer Utility contained in the CD-ROM. See page E-43 for installing the PC Card Viewer Utility. The starting screen for the PC Card Viewer varies depending on the settings of the Setup's Page 2. See Setup on page E-38.

NOTE: Even if you switch the current PC Card Viewer source to another source, the current slide is retained. When you return back to the PC Card Viewer, you will get the slide that has been retained.
A launcher will appear when you press the MENU button.

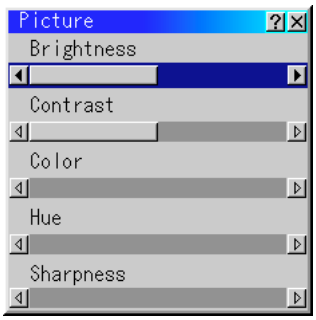


A press of the MENU button displays the toolbar; a press of the MENU button again displays the Menu and hereafter each press of the MENU button switches displaying between the Menu and the toolbar.

The launcher is a tool bar including the following buttons:
Drag ..... Drags to move the tool bar. (for USB mouse operation only)
Prev ..... Returns to the previous slide or folder.
Next ..... Advances to the next slide or folder.
Play ..... Plays back automatically or manually depending on the setting on PC Card Viewer Options of the menu. This allows you to move on to the next slide when "Manual Play" is selected.
Stop ..... Stops Auto Play while you are playing back and to resume playing from the selected slide or folder when "Auto Play" is selected.
Jump ..... Displays a list of slides while you are playing back.
Select ..... Displays a list of folders while you are playing back.
Setup ..... Displays the PC Card Viewer Options dialog box on Page 2 of the Setup dialog box.
Delete ..... Deletes a captured slide(s) or all the captured slides in the selected folder.
View ..... Hides the tool bar while you are playing back. Clicking with the right button of a mouse shows it again.

Provides access to controls for your image. Use the "Select" button on the projector cabinet or the remote control to highlight the menu for the item you want to adjust.

Picture (not available for PC Card Viewer)

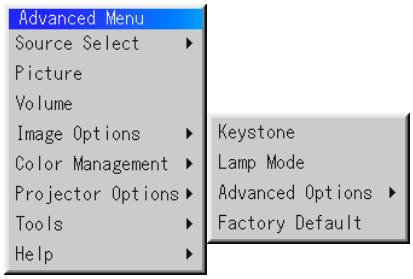


Brightness ..... Adjusts the brightness level or the back raster intensity.
Contrast ..... Adjusts the intensity of the image according to the incoming signal.
Color ..... Increases or decreases the color saturation level (not valid for RGB).
Hue ..... Varies the color level from +/- green to +/-blue. The red level is used as reference. This adjustment is only valid for Video and Component inputs (not valid for RGB).
Sharpness ..... Controls the detail of the image for Video (Not valid for RGB and Component).

Volume (not available for PC Card Viewer)

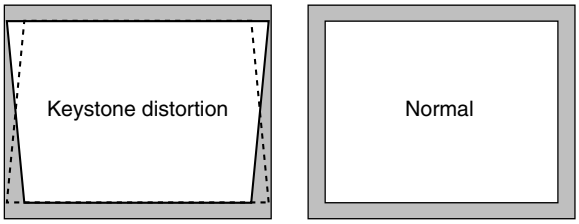
Adjusts the sound level of the projector.
NOTE: You can also display the volume bar without opening the menu. See "Volume Bar (Direct Button)"on page E-37 for more details.

Image Options



Keystone

This feature corrects the keystone (trapezoidal) distortion to make the top of the screen longer or shorter to be the same as the bottom. Use the ◀ or ▶ buttons on the slide bar to correct the keystone (trapezoidal) distortion.



NOTE: The keystone angle can be corrected between 30 degrees upward and 30 degrees downward at a 0 degree-projection angle.

Depending on the type of graphics being used, the picture may get blurred or keystone correction may not be possible when excessive keystone correction is used.
The idea is, the closer you are to native resolution, the better image you will see.

Lamp Mode

This feature enables you to select two brightness mode of the lamp: Normal and Eco modes. The lamp life can be extended up to 1500 hours by using the Eco mode.

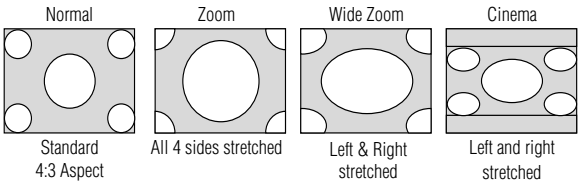
Normal Mode ..... This is the default setting.
Eco Mode ..... Select this mode to increase the lamp life.

NOTE: If you have selected the Eco mode, the lamp lights in Normal mode for one minute after the projector is turned on. After one minute the lamp will change to Eco mode.

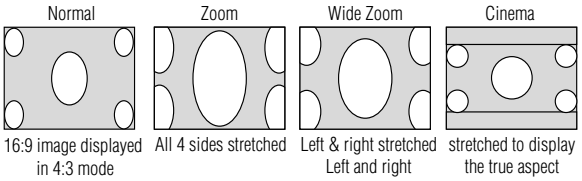
Aspect Ratio (not available for RGB and PC Card Viewer)

Aspect Ratio allows you to select the best Aspect mode to display your source image.

When 4:3 is selected from the source (i.e. DVD player), the following selections will display:



When 16:9 is selected from the source (i.e. DVD player), the following selections will display:

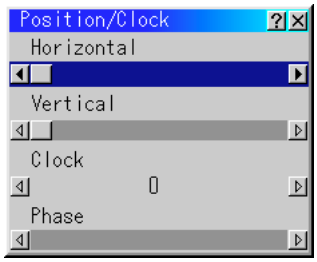


NOTE: You can select three image positions for Cinema: Top, center, and bottom.
See page E-37 for setting image positions.

Noise Reduction (not available for RGB and PC Card Viewer)

You can select three levels video noise reduction.
NOTE: The lower the Noise Reduction level, the better the image quality by way of higher video bandwidth.

Position/ Clock (when Auto Adjust is off)



This allows you to manually adjust the image horizontally and vertically, and adjust Clock and Phase.

Horizontal/Vertical Position:

Adjusts the image location horizontally and vertically using the ◀ and ▶ buttons.
This adjustment is made automatically when the Auto Adjust is turned on. See "Auto Adjust (RGB Only)" on page E-38 for turning on or off the Auto Adjust feature.

Clock ..... Use this item to fine tune the computer image or to remove any vertical banding that might appear. This function adjusts the clock frequencies that eliminate the horizontal banding in the image.
Press the ◀ and ▶ buttons until the banding disappears.
This adjustment may be necessary when you connect your computer for the first time. This adjustment is made automatically when the Auto Adjust is turned on.

Phase ..... Use this item to adjust the clock phase or to reduce video noise, dot interference or cross talk. (This is evident when part of your image appears to be shimmering.) Use the ◀ and ▶ buttons to adjust the image.
Use "Phase" only after the "Clock" is complete.
This adjustment is made automatically when the Auto Adjust is turned on.

Resolution (when Auto Adjust is off)

This allows you to activate or deactivate the Advanced AccuBlend feature.

Auto ..... Turns on the Advanced AccuBlend feature. The projector automatically reduces or enlarges the current image to fit the full screen.

Native ..... Turns off the Advanced AccuBlend feature. The projector displays the current image in its true resolution.
See "Auto Adjust (RGB Only)" on page E-38 for turning on or off the Auto Adjust feature.

NOTE: While you are displaying an image with higher resolution than the projector's native resolution, even when you are in the Native mode, the image is displayed full screen using the Advanced AccuBlend feature.

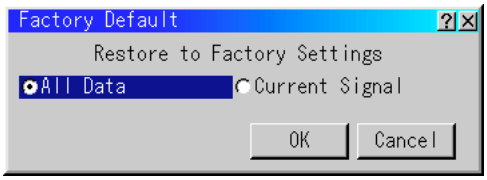
Video Filter (when Auto Adjust is off)

This function reduces video noise.

On ..... The low-pass filter is applied.
Off ..... The filter is removed.

Screen adjustments are possible even when the filter is On.

Factory Default



Changes all adjustments and setting to the factory preset.

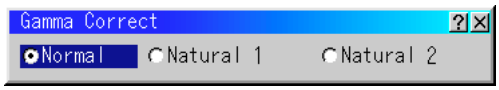
All Data ..... Reset all the adjustments and settings for all the signals to the factory preset.
The items can be reset except Language, Communication Speed, Remaining Lamp Time, Lamp Hour Meter and Projector Usage. (To reset the lamp usage time, see "Clear Lamp Hour Meter" on page E-39.)

Current Signal ..... Resets the adjustments for the current signal to the factory preset levels.
The items that can be reset for the currently projected image are:
Picture (Brightness, Contrast, Color, Hue and Sharpness), Image Options (Aspect Ratio, Noise Reduction, Position/Clock, Resolution and Video Filter) and Color Management (Gamma Correction, Color Matrix and White Balance).

NOTE: The Volume, Keystone and all the items in the Projector Options can be reset only when "All Data" is selected.

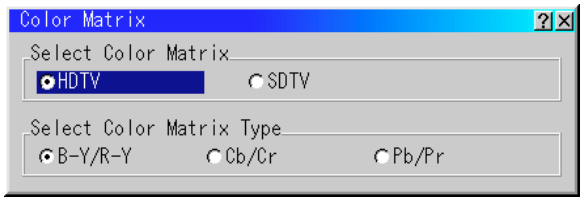
Color Management

Gamma Correction (not available for PC Card Viewer)



Use the ◀ or ▶ button to choose "Normal" when in a lighted room and "Natural 1&2" when in a darkened room. "Natural 1" for better flesh tone; "Natural 2" for true reproduction of middle tones.
Each mode is recommended for :
Normal ..... For the regular picture
Natural 1 ..... For true color reproduction of natural tones
Natural 2 ..... For dark portions of a picture

Color Matrix (available for component video signal only)

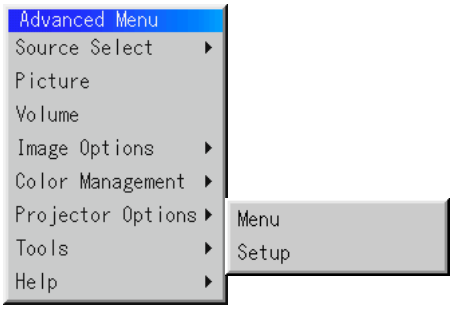


First select an appropriate color matrix to fit your component signal for HDTV or SDTV. Then select an appropriate matrix type from B-Y/R-Y, Cb/Cr or Pb/Pr.

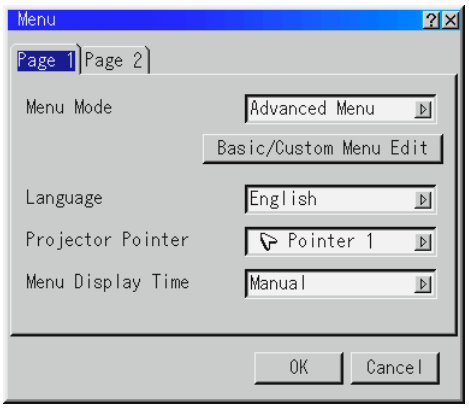
White Balance (not available for PC Card Viewer)

This allows you to adjust the white balance. Brightness for each color (RGB)is used to adjust the black level of the screen;
Contrast for each color (RGB)to adjust the white level of the screen.
First use the ▲ or ▼ buttons to select R, G, or B for the brightness and the contrast. Next use the ◀ or ▶ buttons to adjust the level.

Projector Options



Menu



Allows you to set preferences for the on-screen menu.
Press “OK” to save your changes for all the features of Page 1 and Page 2.

[Page1]
Menu Mode:
This feature allows you to select two menu modes: Advanced Menu and Basic/Custom Menu.
Advanced Menu ..... This is the menu that contains all the available menus and commands.
Basic/Custom Menu ..... This is the menu that you can customize using the Basic/Custom Menu Edit to fit your needs.

The factory default Basic/Custom menu includes:
Source Select (RGB, Video, S-Video and PC Card Viewer), Picture, Volume, Image Options (Keystone), Projector Options (Menu and Setup), Tools (Capture, PC Card Files and ChalkBoad) and Help (Contents and Information).
See page E-29 for instructions about how to customize the Basic/Custom Menu.

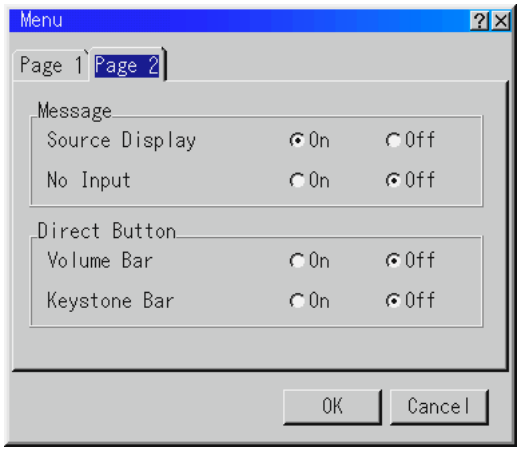
Language:
You can choose one of seven languages for on-screen instructions. The options are: English, German, French, Italian, Spanish, Swedish and Japanese.

Projector Pointer:
This enables you to select from eight different Pointer icons for the "Pointer" button on your remote control.
After moving your Pointer icon to the area you want on the screen, press the Magnify button on the remote control to enlarge the selected area on the screen. See page E-28 for more details.

NOTE: There may be cases where the Pointer function is not available (ex. a non-interlace signal at 15kHz such as video game.)

Menu Display Time :
This option allows you to select how long the projector waits after the last touch of a button to turn off the menu.
The preset choices are "Manual", "Auto 5 sec", "Auto 15 sec", and "Auto 45 sec". The "Auto 45 sec" is the factory preset.
Manual ..... The menu can be turned off manually.
Auto 5 sec ..... The menu will automatically be turned off in 5 seconds if no buttons are pressed within 5 seconds.
Auto 15 sec ..... The menu will automatically be turned off in 15 seconds if no buttons are pressed within 15 seconds.
Auto 45 sec ..... The menu will automatically be turned off in 45 seconds if no buttons are pressed within 45 seconds.

[Page2]



Message:
You can choose the desired information to be displayed on the screen.
On ..... The message will be displayed.
Off ..... The message will not be displayed.

Source Display: You can turn on and off the information for input name such as VIDEO and RGB.
When this option is on, the current input will be displayed each time you switch sources or turn on the projector.

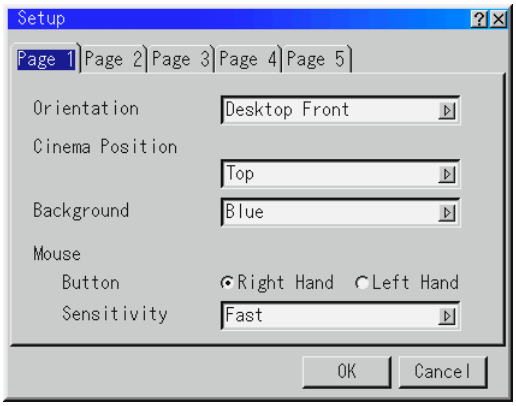
No Input: This option turns on or off the "No Input" message to be displayed in the top right corner on the screen.

Direct Button:
Volume Bar:
This option turns on or off the volume bar when you adjust the sound volume using VOL+/–(up and down) button.
On ..... You can increase or decrease the sound volume with the volume bar on screen.
Off ..... You can increase or decrease the sound volume without having to use the volume bar.

Keystone Bar:
This option turns on or off the keystone bar when you adjust the keystone using KEYSTONE +/– button on the remote control.
On ..... You can increase or decrease the level with the keystone bar on screen.
Off ..... You can increase or decrease the level without having to use the keystone bar.

Setup
Enables you to set operating options.
Press "OK" to save your changes for all the features of Page1, Page2, Page3, Page 4 and Page 5.

[Page1]



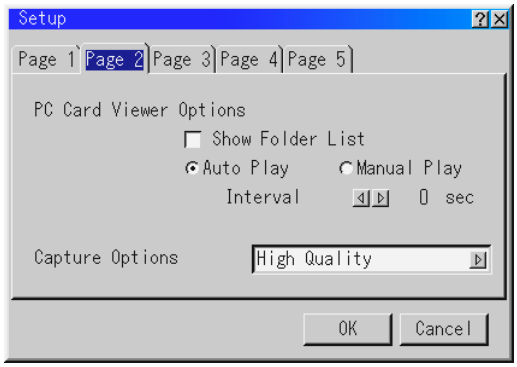
Orientation:
This reorients your image for your type of projection.
The options are: desktop front projection, ceiling rear projection, desktop rear projection, and ceiling front projection.

Cinema Position:
This feature selects the vertical position of the image when viewing video with Cinema aspect ratio selected.
When Cinema aspect ratio is selected on earlier models, the image is displayed with black borders on the top and bottom.
You can select the vertical position among three options:
Top ..... Image position is at the top with a black border on bottom.
Center ..... Image position is at the center with black borders on top and bottom.
Bottom ..... Image position is at the bottom with a black border on top.

Background:
Use this feature to display a blue/ black screen or logo when no signal is available. The default background is blue. You can change the logo screen using the PC Card Files feature. See page E-40.

Mouse Settings:
This option lets you to change your USB mouse settings. The mouse settings feature is available for USB mouse only. Choose the settings you want:
Mouse Button ..... "Right Hand" or "Left Hand"
Mouse Sensitivity ..... "Fast", "Medium" or "Slow"

[Page2]
PC Card Viewer Options



Show Folder List:
If this option is checked, when PC Card Viewer input is selected on the projector, the folder lists will be displayed and allows you to select the presentation from a CompactFlash card.

Auto Play:
If this option is checked, any given slide will start to play automatically.

Auto Play Interval:
You can specify interval time between 5 and 300 seconds.
NOTE: The Auto Play Interval time set on the PC Card Viewer Utility overrides the one set here.

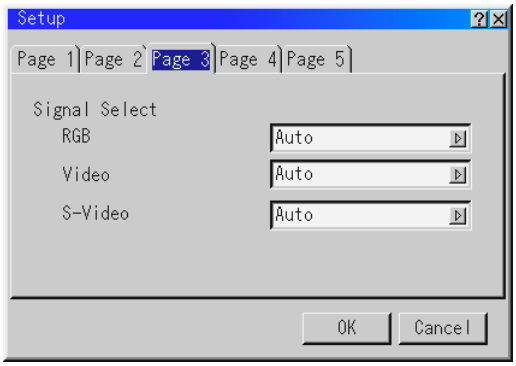
Manual Play:
Views a slide manually when PC Card Viewer input is selected.
NOTE: The Auto Play and Manual Play options determine the behavior of the Play/Stop [▶ / ■] icon on the Viewer toolbar.

NOTE: If you check "Auto Play" and select "PC Card Viewer" on the projector, the slides will automatically start to play back from any given slide.

Capture Options: (available for JPEG only)
These options are used for the Capture function that you can select from Tools. You have three options for JPEG compression quality: High quality, Normal and High Compression.

High Quality ..... Gives quality of JPEG a priority.
Normal ..... Gives normal JPEG quality.
High Compression ..... Gives compression a priority.

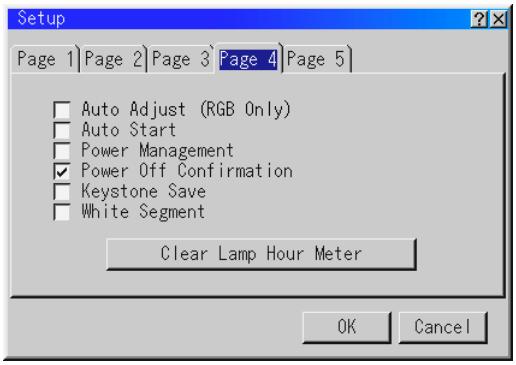
[Page3]
Signal Select



RGB:
Allows you to choose "RGB" for an RGB source such as a computer, or "Component" for a component video source such as a DVD player. Normally select "Auto" and the projector automatically detects a component signal. However there may be some component signals that the projector is unable to detect. If this is the case, select "Component". Select "Scart " for the European Scart.

VIDEO and S-VIDEO:
This feature enables you to select composite video standards manually. Normally select "Auto".
Select the video standard from the pull-down menu.
This must be done for Video and S-Video separately.

[Page4]



Auto Adjust (RGB Only):
When "Auto Adjust" is set to "On", the projector automatically determines the best resolution for the current RGB input signal to project an image using NEC's Advanced AccuBlend Intelligent Pixel Blending Technology.
The image can be automatically adjusted for position and stability; "Horizontal Position", "Vertical Position", "Clock", "Phase", and "Resolution."

On ..... Automatically adjusts image "Horizontal Position", "Vertical Position", "Clock", "Phase" and "Resolution".
Off ..... User can adjust the image display functions ("Horizontal Position", "Vertical Position", "Clock", "Phase" and "Resolution") manually.

Auto Start:
Turns the projector on automatically when the power cable is inserted into an active power outlet. This eliminates the need to always use the "Power" button on the remote control or projector cabinet.

Power Management:
When this option is on and there is no RGB input for five minutes or more, the projector will automatically turn itself off.

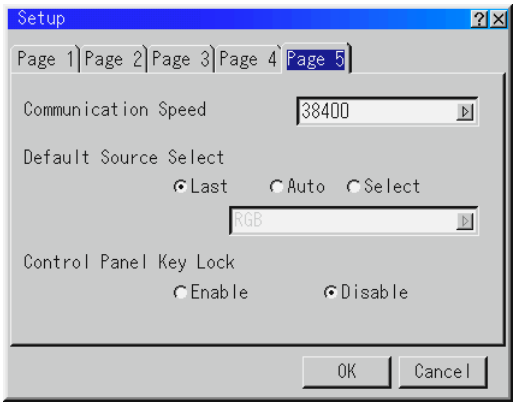
Power Off Confirmation:
This option determines whether a confirmation dialog for turning off the projector will appear or not.
NOTE:
When the confirmation message is displayed, you must be in the Projector mode to operate your projector using the remote control. If not, press the PJ button on the remote control to change your projector to the Projector mode. The button lights to indicate that you are in the Projector mode.

Keystone Save:
This option enables you to save your current keystone settings. Saving your change once affects all sources. The changes are saved when you turn off the projector.

White Segment:
You can put emphasis on either brightness or color for a projected image.
If you prefer putting emphasis on brightness, place a checkmark in the box to turn the option on. If you prefer an image in truer color, turn off this option.

Clear Lamp Hour Meter:
Resets the lamp clock back to zero. Pressing this button appears a confirmation dialog box. To reset the lamp usage hour, press "OK".
NOTE: The projector will turn off and go into standby mode after 1100 hours (up to 1600 hours in Eco mode) of service. If this happens, press the "Help" button on the remote control for ten seconds to reset the lamp clock back to zero. Do this only after replacing the lamp.

[Page5]



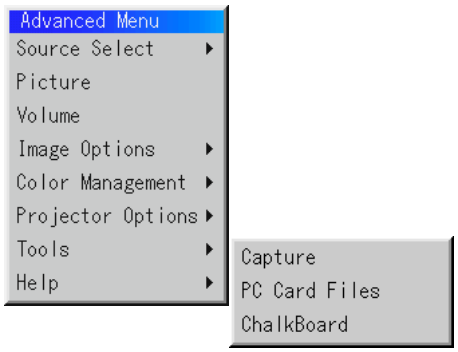
Communication Speed:
This feature sets the baud rate of the PC Control port (Mini DIN 8 Pin).
It supports data rates from 4800 to 38400 bps.
The default is 38400 bps. Select the appropriate baud rate for your equipment to be connected.

Default Source Select:
You can set the projector to default to any one of its inputs each time the projector is turned on.
Last ..... Sets the projector to default to the previous or last active input each time the projector is turned on.
Auto ..... Searches for an active source in order of RGB → Video → S-Video → PC Card Viewer → RGB and displays the first found source.
Select ..... Displays the selected source input every time the projector is started up. Select an input from the pull-down menu.

Control Panel Key Lock:
This option turns on or off the Control Panel Key Lock function.

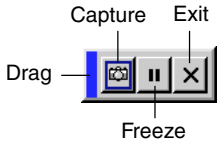
NOTE:
** This Control Panel Key Lock does not affect the remote control and the PC Control functions.*
** When the cabinet buttons are disabled, pressing and holding the CANCEL button for about 10 seconds will change the setting to enabled.*

Tools



Provides tools for capturing images, displaying files in a CompactFlash Card and drawing.
NOTE: The "Capture" and "PC Card Files" features are required for a CompactFlash card.

Capture:
Allows you to capture an image from a source that is currently being displayed. The image is saved as JPEG in the CompactFlash card.
When you select Capture from the menu, you will get a tool bar. You can capture an image directly using the tool bar when the menu is not displayed.



The tool bar includes the following buttons:
Drag ..... Drags to move the tool bar. (for USB mouse operation only)
Capture ..... Captures an image and save it as a JPEG file in a CompactFlash card.
Freeze ..... Freezes and unfreezes images.
Exit ..... Exits the Capture function.

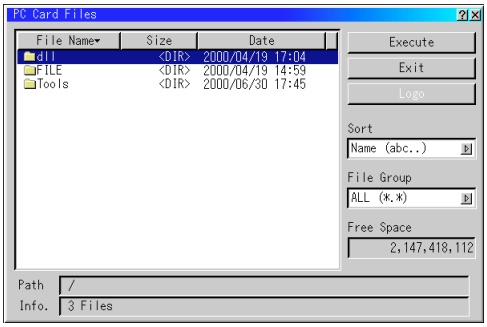
Unless a CompactFlash card is inserted into the PC Card slot of the projector, the Capture feature is not available.
The "Card Error" display means that the free space of the CompactFlash card is insufficient for saving images. Make more space available on the card by erasing unwanted images with your PC. The number of images that can be captured depends on the size of the CompactFlash card.

NOTE: Be sure not to turn off the power or remove the CompactFlash card while capturing an image. Doing so could cause a loss of the data in the CompactFlash card or damage to the card itself.

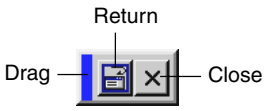
NOTE: Captured images with higher resolution than the projector's native resolution cannot be displayed correctly.

PC Card Files:
Displays a list of all the files stored in the CompactFlash card so that you can select a file you want to display. You can also sort files by file name or date, or display the file.
Although a list of all the files in the CompactFlash card is displayed, you can view files in idx, text, HTML, JPEG and BMP format only. Selecting BMP and JPEG files automatically switches to the PC Card Viewer source.

NOTE: When an image with a resolution of XGA(1024× 768) or higher is projected, the PC Card Files screen may not be correctly displayed.



Selecting "Execute" displays the file you selected.
When you select a JPEG or BMP file and press the Enter button on the remote or the cabinet, or “Execute” on the above, you will get a toolbar. This toolbar is used to return to the PC Card Files screen.

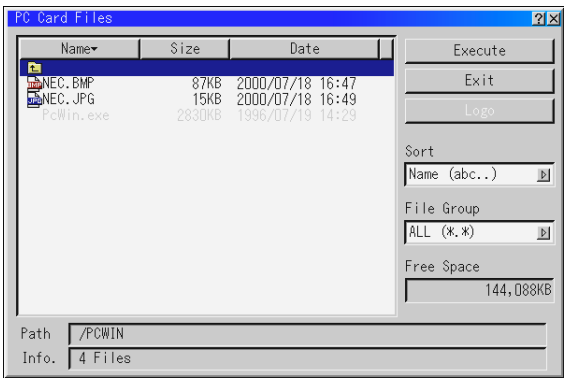


Drag ..... Drags to move the tool bar. (for USB mouse operation only)
Return ..... Returns to the PC Card Files screen.
Close ..... Close the toolbar.

Changing Background Logo
The Logo button allows you to select a background logo from graphic files on a CompactFlash card and change to it as the background logo.

NOTE: File size must be 64KB or less. Other file formats than JPEG and BMP are not available.

1. Use the Select ▲ or ▼ button to select a JPEG or BMP file for your background logo.

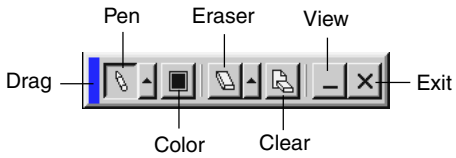


2. Use the Select ▶ and then ▼ button to select “Logo”.
3. Press the Enter on the remote control or the cabinet. You will get the confirmation dialog box.

4. Select “OK” and press the Enter button. This completes changing a logo for the background.

* Once you have changed the background from the NEC logo to another, you cannot return the logo to background even by using Factory Default. To do so, repeat the above steps. The NEC logo file is included on the supplied CD-ROM (/logo/nec_b_x.jpg).

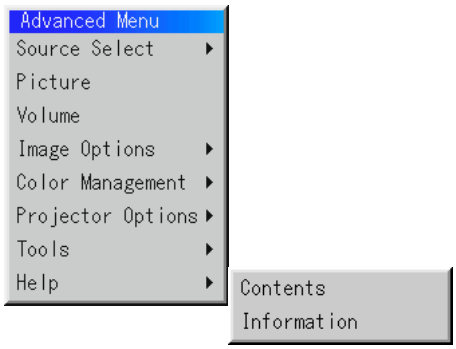
ChalkBoard: (available only when using with USB mouse)
Provides the tool bar for producing freehand drawings.



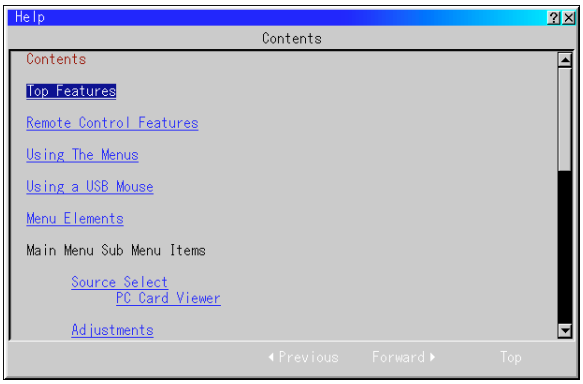
Drag ..... Drags to move the tool bar. (for USB mouse operation only)
Pen ..... Left-click and drag to draw. Left-click [▲] or right-click the pen icon to display the pen palette containing four lines of different thickness from which you can select a line you prefer by left-clicking.
Color ..... Selects a color. Left-click to display the color palette from which you can select a color you prefer by left-clicking.
Eraser ..... Left-click and drag to erase part of a drawing. Left-click [▲] or right-click the eraser icon to display the eraser palette containing four eraser of different thickness from which you can select an eraser you prefer by left-clicking.
Clear ..... Left-click to clear the drawing completely from the ChalkBoard screen.
View ..... Hides the tool bar by left-clicking. Right-clicking anywhere on the screen displays the ChalkBoard tool bar again.
Exit ..... Clears the complete drawing and exits the ChalkBoard.

NOTE:
** The ChalkBoard feature is available only when a USB mouse is used. Freehand drawings cannot be saved or captured.*
** The menu is not available while you display the ChalkBoard screen.*
** The Capture and the Source Display function are not available on ChalkBoard screen.*
** Switching slides clears a drawing completely.*

Help

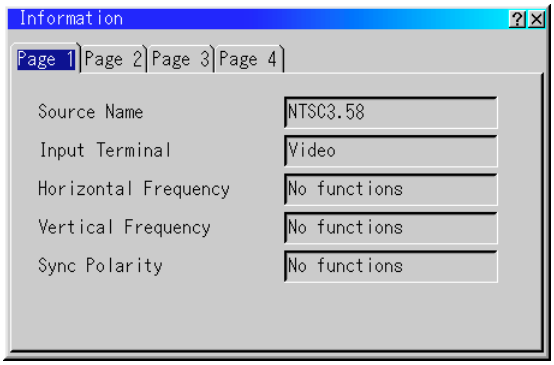


Contents:



Provides an online help about how to use the menus. An underlined link means that you can move to an adjustment item directly. Selecting the underlined link and pressing ENTER moves to the corresponding adjustment item.

Information:



Displays the status of the current signal, and the lamp and the projector usage hours.
This dialog box has four pages.

The information included are as follows:

[Page 1]
Source Name
Input Terminal
Horizontal Frequency
Vertical Frequency
Sync Polarity

[Page 2]
Signal Type
Video Type
Sync Type
Interlace
Resolution

[Page 3]
Aspect Ratio
Gamma Correction
Noise Reduction
Color Matrix
Matrix Type

[Page 4]
Remaining Lamp Time (%)
Lamp Hour Meter (H)
Projector Usage (H)

NOTE:The progress indicator shows the percentage of remaining bulb life. The value informs you of the amount of lamp and projector usage respectively.

Remaining Lamp Time Display:
When the remaining lamp time reaches 0, the Remaining Lamp Time bar indicator changes from 0% to 100 Hours and starts counting down. If the remaining lamp time reaches 0 hours, the projector will not turn on regardless of whether the lamp mode is set to Normal or Eco.

Using the PC Card Viewer function

NOTE: When using the supplied software (CD-ROM)
The software is designed to use with a personal computer only. Do not play the software on CD player. Doing so could cause damage to speakers.

Features

The Viewer feature allows slides stored on a CompactFlash memory card (referred to as CompactFlash card in this manual) to be displayed on the projector. Even if no computer is available, presentations can be conducted simply with the projector. This feature is convenient for holding presentations at meetings and in offices, as well as for playing images taken on digital cameras.

Easy to use

- Presentations can be started immediately simply by inserting a CompactFlash card (not supplied)
- Easy slide switching
- Remote control operation
- Jumping to list of slides or any specific slide

High quality images

- High resolution up to 1024 × 768 dots
- 24-bit full color playback
- Viewing of digital camera images

Simple utility software (for computer)

- PC Card Viewer Utility operable on Windows 95/98 / Me /NT4.0 (SP3 or later)/2000
- Slides can be created by capturing the currently displayed image
- Control screen for displaying lists of slides and editing
- PC Card Viewer PPT Converter 1.0 [Add-In Version] converts files created with Microsoft PowerPoint 95/97/2000 (hereafter referred to as PowerPoint) into indexes playable with PC Card Viewer

* Microsoft, Windows and PowerPoint are registered trademarks of Microsoft Corporation.

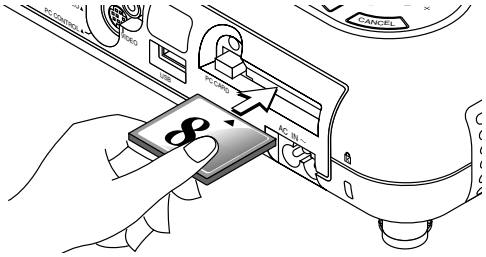
Inserting and Ejecting a CompactFlash Card

A CompactFlash card is used to view presentation data prepared on the computer and to capture and play images projected with the projector.

Inserting the CompactFlash Card

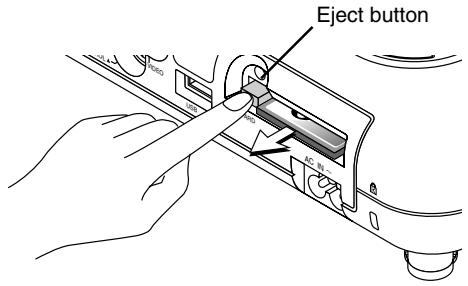
- Hold the CompactFlash card horizontally and insert it slowly into card slot with its top facing up.
- The eject button pops out once the CompactFlash card is fully inserted.
  Check that the CompactFlash card is fully inserted.

NOTE: Do not try to force the CompactFlash card into the slot.



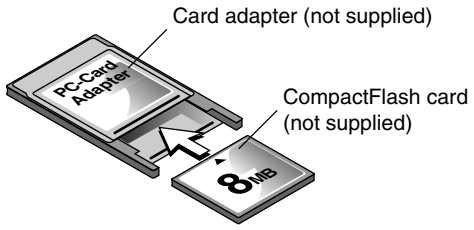
Ejecting the CompactFlash Card

Press the eject button. The CompactFlash card pops out a little. Grasp the edges of the CompactFlash card and pull it out. Do not eject the CompactFlash card while its data is being accessed.



Install the CompactFlash card on a PC card adapter when using on your PC.

- Set the CompactFlash card in the direction shown in the diagram and insert it into the card adapter.



Direction for Inserting the CompactFlash Card

The CompactFlash card has a top and bottom and must be inserted into the PC card slot in a specific direction. It cannot be inserted backwards or upside-down. Attempting to force it into the slot in the wrong direction may break the internal pin and damage the card slot. Refer to the CompactFlash card's operating instructions for the proper direction of insertion.

CompactFlash Card Type

The PC Card slot accepts CompactFlash only.

Installing the PC Card Viewer Software

Before Installing

Perform the following before installing the PC Card Viewer software:

- If Windows is already started, exit all applications. Installation may not be performed properly if any applications are running.

Installation

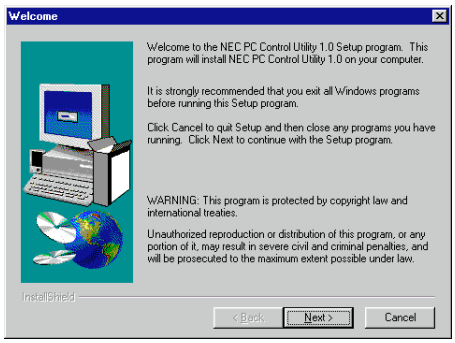
Install the viewer software as described below.
To quit installation before it is completed, press the "Cancel" button then follow the instructions in the dialog box.

1. Start up Windows.

2. Insert the CD-ROM into the CD-ROM drive.
   The auto CD play function automatically starts the CD-ROM's program and the contents screen appears.

   * The auto CD play function operates if the "Auto insert notification" box in the computer's CD-ROM control panel is checked. (The box is checked by default.)

3. Click [Installing the PC Card Viewer Utility 1.0]
   The setup dialog appears.



Welcome
Welcome to the NEC PC Control Utility 1.0 Setup program. This program will install NEC PC Control Utility 1.0 on your computer.
It is strongly recommended that you exit all Windows programs before running this Setup program.
Click Cancel to quit Setup and then close any programs you have running. Click Next to continue with the Setup program.
WARNING: This program is protected by copyright law and international treaties.
Unauthorized reproduction or distribution of this program, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under law.
InstallShield
< Back
Next >
Cancel

   * Follow the instructions in the setup dialog to complete the installation.

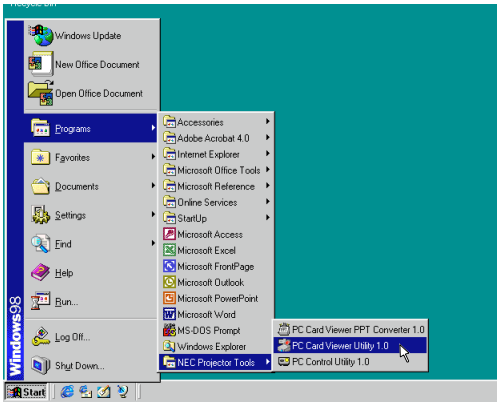
For instructions on uninstalling the PC Card Viewer software, see page E-47.

Starting Up the PC Card Viewer Software on your PC

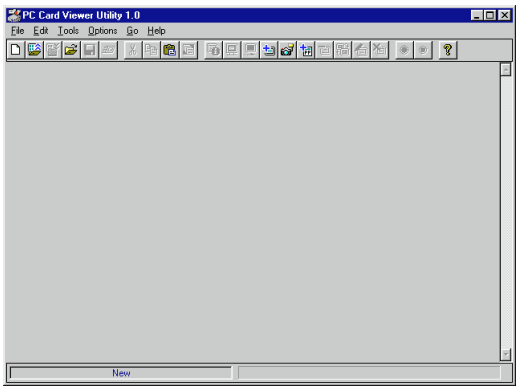
(PC Card Viewer Utility 1.0)

Use the PC Card Viewer Utility 1.0 for creating viewer slides.
To start the PC Card Viewer software:

* Select [Start]-[Programs]-[NEC Projector Tools]-[PC Card Viewer Utility 1.0].



Refer to online help for instructions on using the PC Card Viewer software.



Contents of the English version PC Card Viewer software (PC Card Viewer Utility 1.0)

This is the software used for creating PC Card Viewer slides. In this manual it is referred to as the "PC Card Viewer software".

PC Card Viewer PPT Converter 1.0

This is an application that converts files created with Microsoft PowerPoint 97/2000 into indexes so that they can be played directly with the PC Card Viewer Utility 1.0.
PC Card Viewer PPT Converter is installed automatically when you install the PC Card Viewer Utility.
To start PC Card Viewer PPT Converter:

* Select PC Card Viewer PPT Converter from NEC Projector Tools.

Basic Operation of the PC Card Viewer Software

PC Card Viewer Utility is an application for editing documents, converting them into slides and storing them on CompactFlash cards as playback data (indexes) for presentations using projectors.

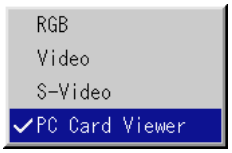
Operating the PC Card Viewer Function from the Projector (playback)

This section describes the operation for showing slides of presentation documents created using the PC Card Viewer function with the projector.
It is also possible to make slides directly from the images projected with the projector.

Projecting slides

1. Insert a CompactFlash card into the card slot.
   Insert the CompactFlash card with the side with the insertion direction arrow on the top.
   * Press the eject button to eject the card.

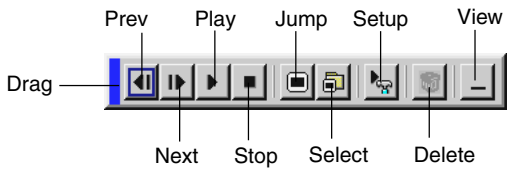
2. Select the "PC Card Viewer" from the Source Select menu.



3. Project slides.

Checking "**Show Folder List**", means that selecting PC Card Viewer input displays a list of the folders in the CompactFlash card and if "**Auto Play**" is checked the projector automatically starts to play slides at the first slide of the folder you have selected.

A tool bar will appear when you press the MENU button on the remote control or the projector cabinet or clicking with the right button of a mouse.



The tool bar includes the following buttons:

	Drag:	Drags to move the tool bar. This is available for USB mouse operation only.
	Prev:	Returns to the previous slide or folder. Or this lets you play slides back in reverse.
	Next:	Advances to the next slide or folder. Or this lets you play slides back.
	Play:	Plays back automatically or manually depending on the setting on PC Card Viewer Options of the menu. This allows you to move on to the next slide when "Manual Play" is selected.
	Stop:	This allows you to stop Auto Play while you are playing back and to resume playing from the selected slide or folder when "Auto Play" is selected.
	Jump:	Displays a list of slides while you are playing back.
	Select:	Displays a list of folders while you are playing back.
	Setup:	Displays the PC Card Viewer Options dialog box on Page 2 of the Setup dialog box.
	Delete:	Deletes a captured slide(s) or all the captured slides in the Capture – specific folder.
	View:	Hides the tool bar while you are playing back. Pressing the MENU button or clicking with the right button of a mouse shows it again.

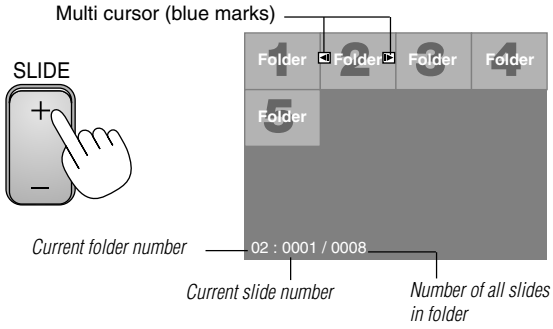
NOTE: If no memory card is inserted in the PC CARD slot, there is no signal, and a black, blue or logo background is displayed, depending on the setting.

Playback is stopped when SLIDE +/- button on the remote control or ◀ ▶ button on the cabinet is pressed in Auto Play mode.

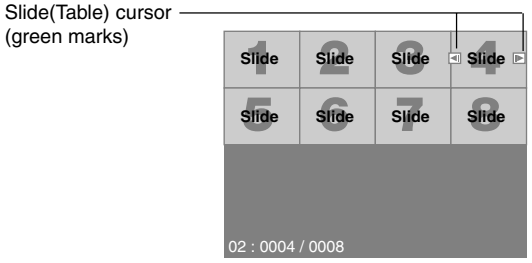
NOTE: Up to 12 indexes can be displayed on the list of folders. The folder in the right bottom is always a folder exclusively for captured images, but is only displayed when images have been captured. To display the list of folders when there are 13 or more indexes stored on the CompactFlash card, select "Edit index" from the PC Card Viewer software's "File" menu and move the index you want to display to within 12 indexes from the top of the folder index. For details on indexes, refer to the PC Card Viewer software's help folder.

When the tool bar is not displayed:

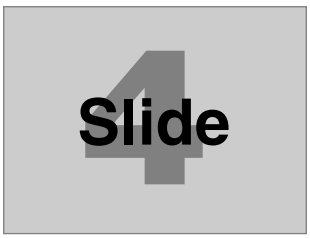
Press the FOLDER LIST button on the remote control to display folders from a CompactFlash card in the projector's PC Card slot.



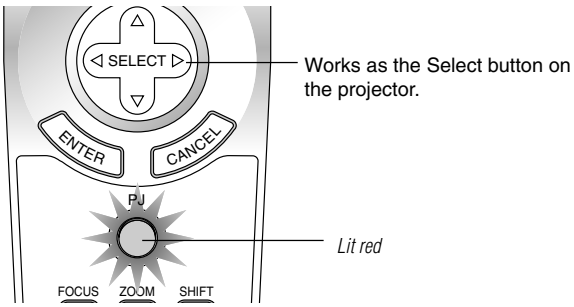
Use the SLIDE +/- button to advance to the next folder or return to the previous folder.



Use the SLIDE +/- button to advance to the next slide or return to the previous slide.



NOTE: You can also use the ◀ and ▶ button on the remote control to select folders or slides.
If you use the ◀ and ▶ button on the remote control for PC Card Viewer operation, press the PJ button to switch to the Projector mode and the PJ button lights red.



Auto Play Mode

- If the "Auto Play" option is selected in "PC Card Viewer Options" of the menu, any given slide will start to play automatically. You can also specify Auto Play Interval between 5 and 300 seconds.

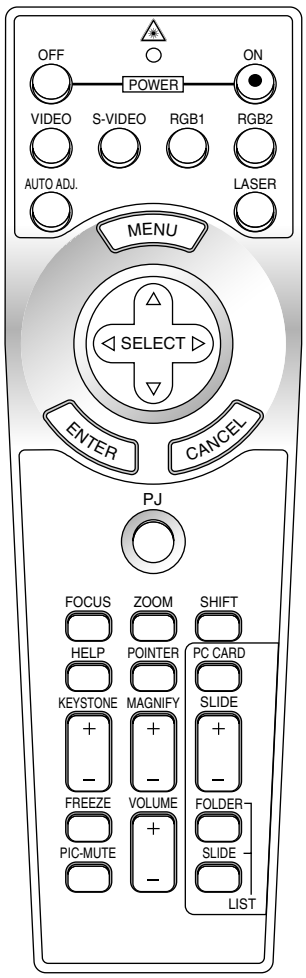
Switching to Slides Directly from Other Input Modes

With this function it is possible to switch directly to a slide when the picture of a VCR or computer is being projected.

Example:

When conducting presentations using a combination of slides and moving pictures from a VCR, etc., it is possible to switch from a PC Card Viewer slide to the video picture then back to the PC Card Viewer slide simply by using a source button and PC CARD button.

***NOTE:** Even if you switch the current PC Card Viewer source to another source, the current slide is retained. When you return back to the PC Card Viewer, you will get the slide that has been retained.*



***NOTE:** The PC card editing operation cannot be performed from the projector. Do so using the PC Card Viewer software.*

Capturing Images Displayed on the Projector

Storing images displayed on the projector on the CompactFlash card

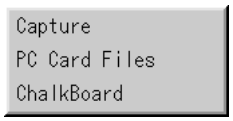
Preparations:

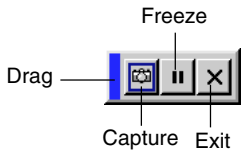
Insert the CompactFlash card into the card slot.

Insert the CompactFlash card with the side with the insertion direction arrow on the top.

* Press the eject button to eject the card.

1. Project the image you wish to store on the projector.
2. Select the “Capture” from the Tools menu.





3. A tool bar will appear.

The tool bar includes the following buttons:

Drag: Drags to move the tool bar (for USB mouse operation only).

Capture: Captures an image and save it as a JPEG file in a CompactFlash card.

Freeze: Freezes and unfreezes images.

Exit: Exits the Capture function. Another option to exit the Capture function is to press MENU or CANCEL button on the remote control or projector cabinet.

NOTE: You can compress a captured file (JPEG) using the Capture Options in the Setup dialog. See page E-38.

NOTE: Captured images with higher resolution than the projector's native resolution cannot be displayed correctly.

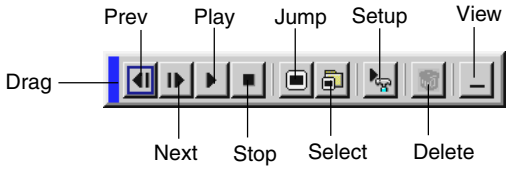
NOTE:

- *File size of the captured image varies depending on the resolution of an input signal.*
- *Since an image data is compressed with the JPEG format, the image is slightly degraded.*

NOTE: An hourglass indicating that an image is being captured appears on the projector's display. Do not eject the CompactFlash card or turn off the projector's power while this icon is displayed. Doing so will damage the CompactFlash card data.
If the CompactFlash card data is damaged, use a computer to repair the data.

NOTE: The folder in the right bottom is always a folder exclusively for captured images. To display the list of folders when there are 13 or more indexes stored on the CompactFlash card, select "Edit index" from the PC Card Viewer software's "File" menu and move the index you want to display to within 12 indexes from the top of the folder index. For details on indexes, refer to the PC Card Viewer software's help file.

Deleting Captured Images



Using the Delete button on the tool bar for PC Card Viewer can delete captured images.
To delete captured images:
1) Select PC Card Viewer.
2) Use ▶ button to select the Capture folder in the right bottom of the screen.
3) Press the MENU button to display the tool bar.
4) Use the ◀ or ▶ button to select the Delete icon and press the ENTER button or click with a mouse button.

Viewing Digital Images

Digital images can be played with the PC Card Viewer if the following conditions are met:

- If the image can be stored on an MS-DOS format CompactFlash card
- If the image can be stored in a format supported by the PC Card Viewer.
  With the PC Card Viewer, images on the card are searched for in directories and images in JPEG or BMP format are recognized as slides.
  Searchable directories are directories within two steps from the root directory, and searchable images are images within the first 12 files in the directory. Only file and slide switching are possible.

NOTE: The maximum number of images recognized as slides within one directory is 128.

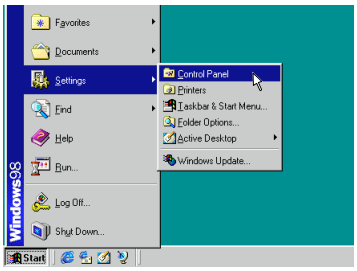
Uninstalling the PC Card Viewer Software

Even if you do now know the PC Card Viewer software's file names or where they are stored, the PC Card Viewer software files can be easily removed from the system using the "Install/Uninstall Applications" control panel in Windows. (Normally there is no need to perform this operation.)

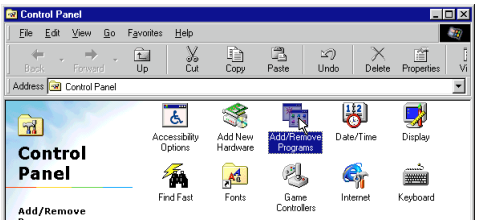
Uninstalling the software

Use the procedure described below to uninstall the PC Card Viewer software files.

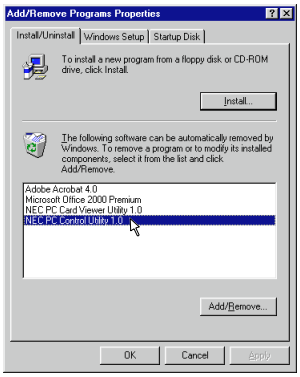
1. From the "Start" menu, select "Settings" then "Control Panels".



2. In the "Control Panels" dialog box, double-click on "Add/Remove Programs".



3. In the "Add/Remove Programs Properties" dialog box, click the "Setup/Remove" tab, then select "PC Card Viewer Utility 1.0" from the list of applications and click on "Add/Remove".



Add/Remove Programs Properties
Install/Uninstall
Windows Setup
Startup Disk
To install a new program from a floppy disk or CD-ROM drive, click Install.
Install...
The following software can be automatically removed by Windows. To remove a program or to modify its installed components, select it from the list and click Add/Remove.
Adobe Acrobat 4.0
Microsoft Office 2000 Premium
NEC PC Card Viewer Utility 1.0
NEC PC Control Utility 1.0
Add/Remove...
OK
Cancel
Apply

4. In the "Confirm File Deletion" dialog box, click "Yes".

Confirm File Deletion
Are you sure you want to completely remove the selected application and all of its components?
Yes
No

5. Once the application is uninstalled, click on "OK" in the "Remove Program From Your Computer" dialog box.

Terminology

PC card	This is the name of a card currently being standardized by the Japan Electronic Industry Association (JEIDA) and PCMCIA (Personal Computer Memory Card Interface Association) of the United States.
ATA card	A type of PC card. ATA was originally a type of interface between computers and fixed disk devices. The ATA card is a standard card-type recording medium.
CompactFlash	CompactFlash card is a small removable card conforming to ATA specifications. It is one-fourth the volume of a PCMCIA card.
TYPE (I, II and III)	PCMCIA 2.1 PC cards are divided into three types according to their thickness: Type I (3.3 mm), Type II (5.0 mm) and Type III (10.5 mm).
BMP	A type of image format. The standard Windows Bit Map format used for MS-DOS/Windows-compatible computers.
JPEG	A type of image format. "JPEG" is the abbreviation of Joint Photographic Experts Group. JPEG compression offers efficient data storage. The data not required for displaying the image is identified and deleted. Since the data is deleted, JPEG algorithms are said to be irreversible. This means that once the image is compressed, the decompressed image it is not the same as the original image.

4. MAINTENANCE

This section describes the simple maintenance procedures you should follow to replace the lamp.

Replacing the Lamp

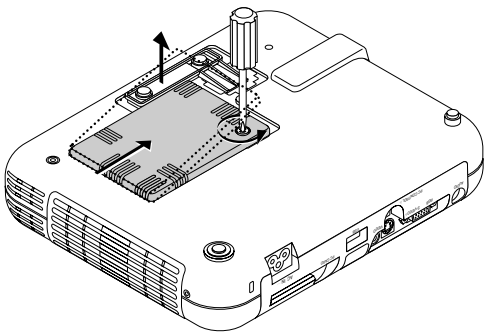
After your lamp has been operating for 1000 hours (up to 1500 hours : Eco mode) or longer, the "Status" indicator in the cabinet will go on and the message will appear. Even though the lamp may still be working, replace it at 1000 hours (up to 1500 hours : Eco mode) to maintain optimal projector performance.

CAUTION

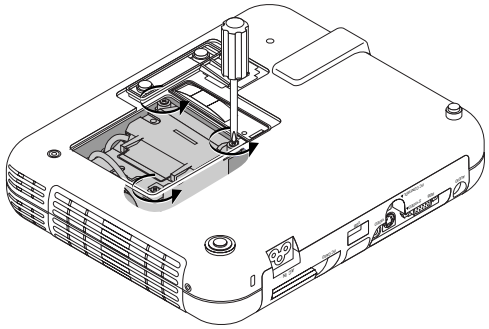
- DO NOT TOUCH THE LAMP immediately after it has been used. It will be extremely hot. Turn the projector off, wait 90 seconds, and then disconnect the power cable. Allow at least one hour for the lamp to cool before handling.
- DO NOT REMOVE ANY SCREWS except the lamp cover screw and three lamp case screws. You could receive an electric shock.
- The projector will turn off and go into stand by mode after 1100 hours (up to 1600 hours : Eco mode) of service. If this happens, be sure to replace the lamp. If you continue to use the lamp after 1000 hours (up to 1500 hours : Eco mode) of use, the lamp bulb may shatter, and pieces of glass may be scattered in the lamp case. Do not touch them as the pieces of glass may cause injury. If this happens, contact your NEC dealer for lamp replacement.

To replace the lamp:

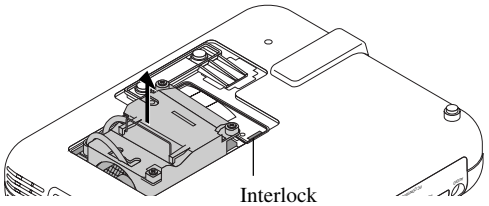
1 Loosen the lamp cover screw until the screwdriver goes into a freewheeling condition and remove the lamp cover. The lamp cover screw is not removable.



2 Loosen the three screws securing the lamp housing until the screwdriver goes into a freewheeling condition. The three screws are not removable.

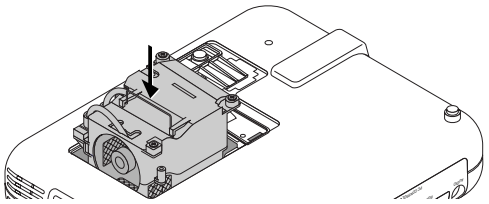


3 Remove the lamp housing by pulling out the handle.
NOTE: There is an interlock on this case to prevent the risk of electrical shock. Do not attempt to circumvent this interlock.



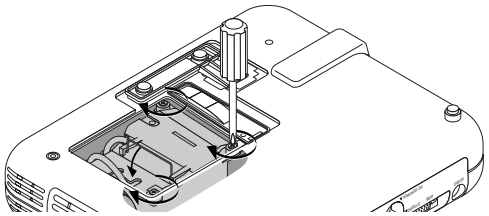
4 Insert a new lamp housing until the lamp housing is plugged into the socket.

CAUTION: Do not use a lamp other than the NEC replacement lamp (LT51LP).

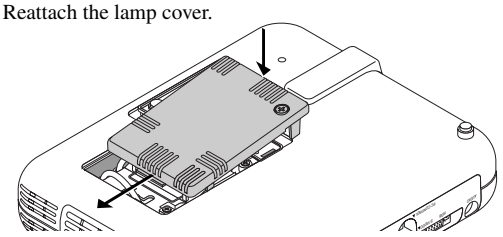


5 Secure it in place with the three screws.

Be sure to tighten the screws.

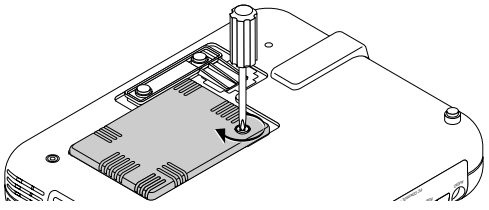


6 Reattach the lamp cover.



7 Tighten the lamp cover screw.

Be sure to tighten the screw.



8 After you install a new lamp, select the Main menu → [Projector Options] → [Setup] → [Page 4] → [Clear Lamp Hour Meter] to reset the lamp usage hours.
If the projector will not be turned on after using 1100 hours (up to 1600 hours : Eco mode) of service, press and hold the [Help] button on the remote control for ten seconds or longer to reset the lamp time clock to zero.

5. TROUBLESHOOTING

This section helps you resolve problems you may encounter while setting up or using the projector.

Power/Status Light Messages

Condition	Power Indicator	Status Indicator	Note
Standby	Steady orange	–	–
Cooling down	Blinking green	–	Blinks green for 90 seconds
Lamp in Normal mode	Steady green	–	–
Lamp in Eco mode	Steady green	Steady green	–
Retrying to turn on lamp	Steady green	Blinking orange	The projector retries 3 times at an interval of 15 sec for max. 45 sec)
One minute after lamp is turned on	Blinking green	No light in Normal mode / Steady green in Eco mode	–
Lamp has reached its end of life (Normal: 1000 hours or over) (Eco: 1500 hours or over)	Steady green	Steady red	Message appears on screen during 1000-1100 hours (1500-1600 hours: Eco mode) of lamp usage. The projector reaches its end of life. Please replace the lamp as soon as possible
Lamp life has reached its end of life (Normal: 1100 hours or over) (Eco: 1600 hours or over)	Steady orange	Steady red	The projector is in standby mode and cannot be turned on.
Lamp cover error	Steady orange	Blinking red (1 sec interval)	The projector is in standby mode and cannot be turned on.
Temperature error	Steady orange	Blinking red (4 sec interval)	The projector is in standby mode and cannot be turned on.
Fan error	Steady orange	Blinking red (8 sec interval)	The projector is in standby mode and cannot be turned on.
Lamp error	Steady orange	Blinking red (12 sec interval)	The projector is in standby mode and cannot be turned on.

Common Problems & Solutions

Problem	Check These Items
Does not turn on	• Check that the power cable is plugged in and that the power button on the projector cabinet or the remote control is on. • Ensure that the lamp cover is installed correctly. See page E-49. • Check to see if the projector has overheated or the lamp usage exceeds 1100 hours (up to 1600 hours : Eco mode). If there is insufficient ventilation around the projector or if the room where you're presenting is particularly warm, move the projector to a cooler location.
No picture	• Use the menu to select your source (Video, S-Video, RGB or PC Card Viewer). See page E-33. • Ensure your cables are connected properly. • Use menus to adjust the brightness and contrast. See page E-33 • Remove the lens cap. • Reset the settings or adjustments to factory preset levels using the Factory Default in the Adjustment Menu. See page E-35
Image isn't square to the screen	• Reposition the projector to improve its angle to the screen. See page E-25 • Use the Keystone in the Adjustment Menu to correct the trapezoid distortion. See page E-34
Picture is blurred	• Adjust the focus. See page E-25 • Reposition the projector to improve its angle to the screen. See page E-25 • Ensure that the distance between the projector and screen is within the adjustment range of the lens. See page E-17
Image is scrolling vertically, horizontally or both	• Use menus or Source button on the remote control or the cabinet to select the source you want to input.
Remote control does not work	• Install new batteries. See page E-14. • Make sure there are no obstacles between you and the projector. • Stand within 22 feet (7 m) of the projector. See page E-14 • Make sure that you are in the Projector mode and the PJ button lights in red. If not, press the PJ button.
Status indicator is lit or blinking	• See the Status Light messages above.
Cross color in RGB mode	• If Auto Adjust is off, turn it on. If Auto Adjust is on, turn it off and balance the image with the Position/Clock in the Image Options. See page E-35 or E-38

When using the PC Card Viewer function

Problem	Check These Items
No picture	• Is "PC Card Viewer" selected from the Source menu? • Is the CompactFlash memory card seated in the PC CARD slot completely? • Are slide data stored in the CompactFlash memory card? • Have the contents of the CompactFlash memory card been destroyed?
Part of a slide is not displayed	• While an image with over 1024 × 768 dots is projected, several lines of information will be lost. Use the supplied software change the image to 1024 × 768 dots in size.
Contents of CompactFlash Card are damaged	• Use a computer, etc., to repair the data.

For more information contact your dealer.

6. SPECIFICATIONS

This section provides technical information about the LT150Z Projector's performance

Model Number LT150Z

Optical

DMD™	Single Chip Digital Micromirror Device(DMD™), 1024x768 dots
Lens	Manual zoom, Manual focus: F2.6 – 2.8 f= 28.3 – 34.0mm
Lamp	135 W NSH lamp
	(The lamp is warranted for 1000 hours of operation time within 6 months.)
Image Size	30 - 200 inches (0.8 - 5.1 m) diagonal
Projection Distance	3.8 – 31.7ft (1.16 – 9.67m)

Electrical

Inputs	Video (NTSC / PAL / PAL-N / PAL-M / PAL60 / SECAM / NTSC4.43)
	Horizontal Frequency : 15 -100 kHz (RGB : 24 kHz or over)
	Vertical Frequency : 50 -120 Hz
Video Bandwidth	RGB: 80 MHz (-3dB)
Color Reproduction	Full color, 16.7 million colors simultaneously.
Horizontal Resolution	550 TV lines : NTSC / PAL / YCbCr
	300 TV lines : SECAM
	RGB 1024 dots horizontal, 768 dots vertical
Power Requirement	100 - 120 / 200 - 240 VAC, 50 / 60 Hz
Input Current	2.2 A (100 -120 VAC) / 1.1A (200 -240 VAC)

Mechanical

Dimensions	9.6" (W) x 2.1" (H) x 7.7" (D) / 243mm (W) x 53mm (H) x 196mm (D) (not including protrusions)
Net Weight	3.3 lbs / 1.5 kg
Environmental Considerations	Operational Temperatures : 41˚ to 95˚F (5˚ to 35˚C), 20 to 80% humidity
	Storage Temperatures :14˚ to 122˚F (-10˚ to 50˚C), 20 to 80% humidity
Regulations	UL Approved (UL 1950, CSA 950)
	Meets DOC Canada Class B requirements
	Meets FCC Class B requirements
	Meets AS/NZS3548 Class B
	Meets EMC Directive (EN55022, EN55024, EN61000-3-2, EN61000-3-3)
	Meets Low Voltage Directive (EN60950, TUV GS Approved)
	CE
